TERM EXPIRING JUNE 1981

PETER H. BENNETT, M.D., *Phoenix*
WILLIAM G. BLACKARD, M.D., *Richmond,*
Virginia
MORTON F. GOLDBERG, M.D., *Chicago*
ORION D. HEGRE, Ph.D., *Minneapolis*
JOHN E. LILJENQUIST, M.D., *Nashville*
M. ALAN PERMUTT, M.D., *St. Louis*
MARK A. SPERLING, M.D., *Cincinnati*

DIABETES is published by the American Diabetes Association, Inc., to provide an official Journal for the Association and to furnish the medical profession with information concerning diabetes and related fields of medicine. Manuscripts received after April 1, 1977 and subsequently accepted will incur a charge of \$25. per printed page, which may be waived under special conditions at the discretion of the Editor.

Contributions are invited from practicing physicians, clinical and laboratory investigators, and others who have data of importance to offer in these fields. Manuscripts, if suitable, will be accepted providing that the text has not been printed elsewhere.

Matter appearing in DIABETES is copyrighted by the American Diabetes Association, Inc. Permission to reproduce all or parts of papers appearing in it may be granted under appropriate conditions and if proper credit is given. Such requests should be addressed in writing to the Secretary of the Association, accompanied by a letter of permission from the senior author.

All signed articles and editorials are the

responsibility of the author(s) and not that of the American Diabetes Association. The Editors will be pleased to consider for publication papers presented at the Annual Meeting of the Association. *Manuscript Specifications:* The length of manuscripts (not including special articles or letters) should be limited to 5,000 words, exclusive of illustrations, etc. Exceptions to this limitation will be made at the discretion of the Editors.

Communications for the "Brief Notes and Comments" department should not exceed 1,000 words except in unusual circumstances. Figures and tables in these brief communications should be limited to one of each, and references should not exceed twenty in number.

Manuscripts should be typewritten, with double spacing, and if possible, submitted in triplicate together with three copies of figures and photomicrographs. Authors' and coauthors' degrees should be cited.

References should be presented in the style of the following examples: For Periodicals—Banting, F. G., and Best, C. H.: The internal secretion of the pancreas. *J. Lab. Clin. Med.* 7:251-66, Feb. 1922.

For Books—Allen, Frederick M.: *Studies Concerning Glycosuria and Diabetes.* Cambridge, Harvard University Press, 1913, p. 461.

An abstract or summary of the content of the paper in not more than 250 words should usually appear at the beginning. This should be self-contained and understandable without reference to the text.

Photographs, drawings, and figures should be suitable for reproduction. Photographs should be unmounted, untrimmed glossy prints. The names of authors should appear on the back. The tops of photographs and figures should be indicated.

Galley proofs are sent to the principal author of each paper, with a price list and order blank for reprints.

All manuscripts and related correspondence should be addressed to David M. Kipnis, M.D., 660 South Euclid, Box 8121, St. Louis, Mo. 63110. Editorial correspondence should be addressed to the Editorial Office, DIABETES, American Diabetes Association, Inc., 600 Fifth Avenue, New York, New York 10020.

Subscription and Advertising Information

DIABETES *The Journal of the American Diabetes Association* is published every month by the Association at 600 Fifth Avenue, New York, New York 10020. © American Diabetes Association, Inc., 1979. All rights reserved under International and Pan-American Copyright Convention.

Professional Members receive the Journal as part of their membership privileges. The annual subscription rates for nonmembers are as follows: \$40.00 for one year, \$70.00 for two years, \$100.00 for three years.

Individual copies \$3.50 Foreign postage at \$4.00 per year applies to all foreign countries, including Canada, Mexico, and other countries in the Postal Union of the Americas and Spain.

Subscriptions for medical students and physicians within five years after completion of medical school and bioscientists who are predoctoral or not more than two years postdoctoral are \$20.00 per year plus foreign postage where applicable. Subscriptions in this category may be entered or renewed for only one-year terms.

Correspondence concerning subscriptions should be addressed to the Subscription Department, DIABETES

Checks, money orders, and drafts for subscriptions should be made payable to the American Diabetes Association, Inc., and sent to the aforementioned address.

Information concerning the microfilm edition of this Journal may be obtained from the offices of University Microfilms, P. O. Box 1346, Ann Arbor, Michigan 48106.

All inquiries about advertising and other business matters should be addressed to the Managing Editor of the American Diabetes Association. The publishers reserve in their full discretion the right to accept or reject any proposed advertisement and the right to cancel any advertising contract.

SUBJECT INDEX 1978

This index covers all reading matter in Volume 27 of **DIABETES** except the Abstracts listed at the end of *Review and Abstracts* articles. Entries marked with an asterisk (*) indicate material that appeared in Supplement 2 only. The Author Index begins on page 47.

A

ABDOMEN

sympathetic trunk
of ketotic diabetic Chinese hamster,
*435

ACANTHOSIS NIGRICANS

with glucose intolerance and hyperinsulinemia, *451

ACETOACETATE

uptake by baboon fetus, *488

N-ACETYL-GLUCOSAMINE

metabolism and insulin releasing capabilities of, *515

ACETYSALICYLIC ACID. *See* Aspirin

ACID

acetylsalicylic, *see* Aspirin
arachidonic
and platelet aggregation, 346
barbituric
protection against alloxan inhibition of glucose-induced insulin release by, 71-76
vanilmandelic
urinary excretion of, body weight and, 389

ACID-ETHANOL EXTRACTS

of chick embryo pancreas
differentiation studies on, *478

ACIDOSIS, LACTIC

and intravenous dichloroacetate, *494

ACIDOSIS, METABOLIC

hyperchloremic
in diabetes mellitus, 16-20

ACTOMYSIN

rat smooth muscle
antisera to, in rat glomerular mesangium, 632-641

ADENYL CYCLASE-CYCLIC AMP SYSTEM

and insulin release during fasting,
*489

ADIPOCYTES

of aged, obese rats
intracellular nonmetabolized glucose accumulation in, *462
calcium binding
epinephrine and, *491
concentration of
effects of glucose metabolism, *472
endoplasmic reticulum
insulin-sensitive calcium transport by, *468
human
anti-insulin receptor autoantibodies and metabolism of, *483
insulin binding to, 946-958
insulin inhibition of lipolysis in cyclic AMP and, *469
metabolism
effects of anti-insulin receptor autoantibodies on, 938-944
rat, plasma membranes
¹²⁵I-insulin binding to, antibodies against hexose transport system and, *460
insulin-sensitive phosphoprotein of, *453

ADIPOSE TISSUE. *See also* Adipocytes

adipocyte metabolism
effects of anti-insulin receptor autoantibodies on, 938-944
hexose metabolism
insulin and procaine effects on, *481
insulin metabolism
in portal blood flow study, 841-848
mouse
insulin-dextran complex, anti-insulin receptor antibody and concanavalin A activation of pyruvate dehydrogenase in, *502

proinsulin and insulin disposition in rats, 404

rat

cell plasma membranes of,
D-glucose sensitive
cytochalasin B binding sites in, *453
insulin receptors and glucose transport in, *452
response to insulin
in high-fat and low-fat diet fed rats, 114-119
of streptozotocin-diabetic rat
decreased protein activator in, *505

ADRENAL MEDULLA

in fasted pregnant rats, *486

ADRENERGIC BLOCKADE

of exercise-induced pancreatic polypeptide secretion, *468
and glucose intolerance following hypoglycemia, *511

ADRENERGIC SYSTEM

and hypoglycemia during oral glucose tolerance tests, *484
and impaired insulin secretion during spinal anesthesia, *480

AGE

and between-load differences in oral glucose tolerance tests, 45
and bimodality of glucose tolerance distributions, 794-799
diabetes prevalence in school-age children in Minnesota by, 58
of diabetics in myocardial performance study, 127, 128, 130
of diabetics in plasma glucagon response to oral glucose loading study, 1145, 1146
and effects of pancreatic islet is transplantation on reversal of diabetes in rats, 627-630
and erythrocyte deformability, 899

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

December, 1145-1232

SUBJECT INDEX 1978

- and glucagon binding by liver membranes in rats, 589-591
 - and glucose intolerance in hyperthyroid patients, 543-548
 - and immunoreactive gastric inhibitory polypeptide secretion, 852
 - and insulin secretion by isolated rat islets, *499
 - at onset of diabetes
 - and residual beta cell function, 262-264
 - of patients in glucose tolerance and viral hepatitis study, 662
 - of patients in hypertriglyceridemia study, 686, 687
 - of patients in insulin resistance and sulfated insulin studies, 312
 - of potent and impotent diabetic and nondiabetic men with arterial occlusive disease, 976-980
 - of subjects in acute insulin response and sodium salicylate study, 750, 751
 - of subjects in somatostatin study, 301
 - and testosterone effects in streptozotocin-diabetic mice, *492
- AGING**
- and cultured skin fibroblast viability studies in juvenile diabetics, 338-341
 - and glucose accumulation in adipose cells of obese rats, *462
 - and insulin amyloidosis, 357
 - in obese rats
 - primary inhibition of insulin-stimulated glucose transport in muscle from, *472
 - "premature" diabetes and, 583
- ALANINE**
- circulating
 - production and disposal rates in healthy subjects, 287-294
 - disposal in diabetes, 420-426
 - production
 - in skeletal muscle in tissue culture, *496
- U-¹⁴C ALANINE**
- in alanine disposal study in diabetics, 420-426
 - in circulating alanine production and disposal study in healthy subjects, 287-294
- ALANINE CARBON**
- sources of, 293
- ALBUMIN**
- increased concentrations in basement membranes in diabetic nephropathy
 - specificity of, *446
 - urinary excretion of
 - in islet-transplanted diabetic rats, *506
- ALBUMINURIA**
- in streptozotocin-diabetic rats
 - pancreatic islet transplantation and, 959-963
- ALCOHOL**
- polyhydric
 - formation in mammalian tissues, 108
 - in streptozotocin-diabetic mice, *460
- ALCOHOLISM**
- and hypoglycemic coma with ketoacidosis, *465
- ALDOSE REDUCTASE**
- activity
 - of retinal and cerebral microvessels, *475
 - immunohistochemical localization in rat, *463
- ALDOSTERONE**
- response
 - in diabetics, 732-736
- ALLAN, FRANK N.,**
- obituary, 135-136
- ALLERGY**
- to insulin
 - and sulfated insulins, 310, 312
- ALLOXAN**
- assays, 72-73, 74-76
 - inhibition of glucose-induced insulin release
 - mechanism of barbituric-acid protection against, in isolated rat islets, 71-76
 - in insulin secretion study, *456
 - nephrotoxicity study, *484
 - in rats fed different diets
 - and biochemical and histologic examination of endocrine pancreas, *473
- stimulation and inhibition of insulin release from isolated rat islets of Langerhans, 1205-1214
- ALLOXAN DIABETES**
- barbituric-acid protection against, 71-76
 - in dogs
 - and efficacy of insulin suppositories, *514
 - and plasma somatostatin-like immunoreactivity, *442
 - in mice
 - and immunodeficiency, *460
 - in rats
 - and erythrocyte deformability studies, 897-898
 - and fetal pancreatic transplant growth and insulin, *492
 - and insulin action and cyclic IMP study, *499
 - and pancreas transplantation, and prevention of kidney and eye lesions, *446
 - and renal growth, *481
 - and syngeneic transplantation of fetal rat pancreas, 982-986, 988-994
- ALPHA ADRENERGIC SYSTEM**
- agonism
 - and pancreatic somatostatin and glucagon release, *502
 - and clonidine induction of defective insulin secretion and impaired glucose tolerance, 554-561
 - inhibition of insulin secretion reversal by sodium salicylate, *493
- AMERICAN DIABETES ASSOCIATION**
- annual ADA camp workshop, 610
 - Annual Diabetes Seminar
 - Twenty-sixth, 792
 - Annual Meeting, 430
 - Thirty-eighth, 609-610
 - Thirty-ninth, 966-967
 - Combined Health Care Professionals Course, 882, 966
 - conference on diabetes management, 792
 - Diabetes Care* instructions to contributors, 68
 - Diabetes* index, 430
 - Erratum in *Diabetes*, 143, 356, 1144
 - Future Meetings, 69, 140-141, 353-354, 429-430, 608-609, 699-

 Statement of Ownership, Management and Circulation, 1232
 summer camp list, 430
- AMINO ACID TOLERANCE TESTS**
 jejunoileal bypass surgery and, 78-83
- AMINO ACIDS**
 and glucagon secretion in protein-fed rats, *475
 infusion in premature infants and insulin and growth hormone response, 334-337
 insulin response to
 after jejunoileal bypass surgery, 78-83
 metabolism
 glucose and, *461
 in skeletal muscle in tissue culture, *496
 metabolism in perfused rat skeletal muscle
 dichloroacetate and, 1065-1073
 stimulation of glucagon secretion by islets of high-protein-fed rats, 370-376
 uptake by placenta
 insulin and, 530
 utilization
 in fat cells of diabetic rats, *479
- AMMONIUM CHLORIDE**
 and hyperchloremic metabolic acidosis, 18
- AMYLASE ISOZYMES**
 in diabetic ketoacidosis, *510
- AMYLOIDOSIS**
 in islets of Langerhans of diabetic *Macaca nigra* monkeys, 357-363
- ANESTHESIA**
 glucagon levels and
 in normal and diabetic patients, *492
 d-propranolol
 imitation of insulin action in cultured lymphocytes, *508
 spinal
 impaired insulin secretion during, *480
- ANGIOGRAPHY, FLUORESCIN**
 determination of microaneurysms in diabetic retinopathy with, 593
 in juvenile-onset diabetics with no detectable retinopathy, 85, 87
 and microvascular disease
 correlation of hemoglobin A₁ levels with, *434
- ANGIOPATHY, DIABETIC**
 and circulating immune complexes, *486
 and conversion of very low density lipoproteins to low density lipoproteins, *447
 evaluation of
 and plethysmography, 726-731
- ANGIOTENSIN**
 -converting enzyme activity in diabetics, *471
- ANION GAP**
 in diabetic ketoacidosis, 16
- ANOREXIA NERVOSA**
 urine C-peptide immunoreactivity in, 212
- ANTIBODIES**
 against hexose transport and glucose transport and insulin binding in rat adipocytes, *460
 to aldose reductase, *463
 anti-insulin
 adipocyte metabolism and, 938-944
 affinity, role in insulin resistance, *496
 assays of, 218
 and binding effects on free insulin levels in acute diabetic ketoacidosis patients, 1151-1154
 effects on metabolic control in diabetics, hemoglobin A₁ determinations and, *436
 equilibrium binding assay and kinetic characterization of, 653-659
 in insulin immunogenicity studies in several animal species, 8-14
 measurement of, 307
 to insulin receptors
 cross-linked with second antibody, *449
 and pyruvate dehydrogenase in mouse adipose tissue, *502
 islet cell
 C-peptide assays for islet cell function in diabetics with, 265-266
 HLA typing in Pima Indians and, *460
 in insulin-dependent diabetics, 247-250
 and prediction of oral hypoglycemic agent failure in diabetics, *483
 in rabbits immunized with islet cells, *458
 and killer cell activity in insulin-dependent diabetes, *459
 to nucleic acids in juvenile-onset diabetics, 1105-1110
 pancreatic polypeptide
 in insulin-treated diabetics and Methimazole-treated hyperthyroids, *466
 to somatostatin, glucagon, insulin and pancreatic polypeptide
 in studies of islet cells of spontaneously diabetic mice, 2-6
- ANTIGENS. See also** HLA antigens
 in diabetic mice, *460
 glomerular, in diabetic rats
 increased mesangial actomyosin in, 632-641
- ANTISERUM**
 to neurotensin
 in histamine and neurotensin

April, 357-430		December, 1145-1232

SUBJECT INDEX 1978

- hyperglycemia study, 577-582
- to C-peptide
 - characterization of, 170-177
- to rat smooth muscle actomyosin and myosin
 - in glomerular mesangium of diabetic rats, 632-641
- AORTOGRAPHY**
 - translumbar
 - and impotence in diabetic and non-diabetic arterial occlusive disease, 975-981
- ARACHIDONIC ACID**
 - and platelet aggregation, 346
- ARGININE**
 - and gastric glucagon release, *487
 - and glucagon secretion in islets of high-protein-fed rats, 371-373
 - induced glucagon and insulin release
 - verapamil and, 998-1000
 - induced glucagon and insulin release from perfused rat pancreas
 - prostaglandins and, 804-805
 - induced insulin release
 - epinephrine and, 321-322
 - infusion
 - glucose homeostasis during,
 - somatostatin and glucagon-specific analog effect on, *489
 - infusion after jejunal or ileal resection in dogs
 - pancreatic glucagon release and, 1156-1165
 - infusion in pancreatectomized patients, 1006, 1007, 1009
 - insulin and glucagon responses to in stressed islet-transplanted diabetic rats, 826
- ARGININE TOLERANCE TEST**
 - during remission phase of juvenile diabetes, 671, 672
- ARTERIES**
 - femoral, plasma glucose concentrations
 - in glucose loaded dogs, 23-24
 - femoral disease in diabetes
 - lipid levels and, *448
 - ketone concentrations in juvenile diabetics
 - fructose infusion and, 709-713
 - occlusive disease in diabetics and non-diabetics
 - impotence and, 975-981
 - pancreatic

- injection of insulinotropic substances in dogs, time courses of insulin release following, 1189-1195
- smooth-muscle cells
 - effect of glucose and sorbitol on proliferation of, 583-587
- ARTERIOGRAPHY**
 - and preoperative localization of insulinomas, *509
- ARTERIOSCLEROTIC DISEASE**
 - and diabetes
 - and high density lipoprotein-cholesterol levels, *516
- ARTIFICIAL PANCREAS**
 - beta-cell
 - algorithm flexibility in, *482
 - in diabetics undergoing surgery, *431
 - determination of insulin requirements in brittle diabetics with, 825-832
 - endocrine
 - effects of glucagon concentrations on insulin requirements and blood glucose levels in diabetics and, 649-652
 - glucagon suppressibility to oral glucose loads in diabetics controlled with, *431
 - glycemic control in insulin-treated diabetics by
 - metabolic response to, *431
 - insulin requirements in brittle diabetics determined with, *437
 - and intraperitoneal delivery of insulin during dialysis, *439
 - portable insulin delivery system
 - and glycemic control in pancreatectomized dogs, *439
 - use during insulinoma resection, 774-777
- ASCORBIC ACID.** *See* Vitamins, C
- L-ASPARAGINASE**
 - induced glucose intolerance
 - and immunoreactive glucagon levels, *486
- ASPIRIN**
 - and glucose disappearance rates in dogs, *467
 - and insulin and glucagon secretion
 - and glucose tolerance in diabetics and normals, 1196-1202
 - and insulin secretion, *457

- and prostaglandin E production by platelets from diabetics, *501
- ATAXIA-TELANGIECTASIA**
 - IgA deficiency in, 1096
- ATHEROSCLEROSIS**
 - and diabetes, 1078
 - in *Macaca nigra*, *447
 - proliferation of arterial smooth-muscle cells and, 583
 - and insulin effect on cholesterol metabolism, 1059
- ATROPINE**
 - effect on glucose-stimulated gastric inhibitory polypeptide, 638-641
- AUTOANALYZER**, 671
- AUTOANTIBODIES**
 - to insulin receptors
 - and human adipocyte metabolism, *483
- AUTOIMMUNITY**
 - and virus-induced diabetes, 1133-1134
- AUTORADIOGRAPHY**
 - in study of distribution of insulin receptors on surface of placental villi, 531, 532, 533-536

B

- BABOON**
 - fetus
 - acetoacetate uptake by, *488
- BACTERIA**
 - aerobic
 - colony-forming units in gastrointestinal tract of ketotic diabetic hamsters, *475
 - cloning of rat preproinsulin in, *455
 - intracellular killing by granulocytes
 - diabetes control and, 889-894
 - and skin preparation before insulin injection, *485
- BARBITURIC ACID**
 - protection against alloxan inhibition of glucose-induced insulin release by, 71-76
- BASEMENT MEMBRANE**
 - glomerular

SUBJECT INDEX 1978

- in diabetic rats with and without unilateral nephrectomy, 38
- of normal and diabetic rats, *471
- thickening in spontaneously diabetic Chinese hamsters, *446
- glomerular and skeletal muscle capillary
 - relationship between, *513
- increase in acute diabetes, *432
- specificity of increased albumin concentration in
 - in diabetic nephropathy, *446
- thickening
 - in capillaries of skeletal muscle of diabetics, *445
- BEHAVIOR**
 - food intake and, *469
- BEST, CHARLES H.**, 430
- BETA-ADRENERGIC RECEPTORS**
 - and epinephrine enhancement of potassium-stimulated immunoreactive insulin secretion, 550-553
- BICARBONATE**
 - balance
 - and hyperchloremic metabolic acidosis, 18-19
- BIGUANIDES**
 - comparison with McN-3495, 868-875
- BL-9**
 - in insulin preparations, 297-298
- BLADDER**
 - cancer
 - saccharin ban and, 878-879
 - dysfunction
 - and autonomic neuropathy, 1049-1050
- BLINDNESS**
 - and kidney transplantation in diabetics, *435
- BLOOD**
 - bicarbonate
 - in hyperchloremic metabolic acidosis, 16
 - coagulation
 - and diabetes, 346
 - coagulation disorders
 - in streptozotocin diabetic rats, *514
 - effect of acute water intoxication in, 62
 - erythrocytes
 - deformability in diabetics, *463, 895-901
 - insulin receptors on, 701-708
 - flow, forearm
 - in middle-aged adult-onset diabetics, 726-731
 - flow, portal
 - and fasting peripheral insulin concentrations, 840-847
 - gases and electrolytes
 - in low-dose insulin infusion therapy of diabetic ketoacidosis, *465
 - glycosylated hemoglobin
 - bimodal distribution in Pima Indians, *434
 - and cholesterol and low density lipoprotein cholesterol in insulin-dependent diabetics, *505
 - in juvenile diabetics, *464

- ment and protection against
alloxan in rats, *473
- and very low density lipoprotein
composition and structural
changes, 1215-1227
- dietary, source and amount of
plasma insulin and glucose and vari-
ations in, 1020-1025
- high, and high fiber diets
for insulin-treated diabetic men,
*443
- induced changes in very low density
lipoprotein composition, *513
- metabolism
hepatic, ketogenesis and, *433
- requirements for phosphatidylinositol
hydrolysis by isolated rat is-
let, *482
- restricted
and pancreatic insulin and severity
of long-term diabetes in rats,
*504
- CARBOHYDRATE INTOLERANCE**
in chemical diabetes, 909, 913
- CARBOHYDRATE METABOLISM**
and choline deprivation in rats, *506
- defects
Venezuelan encephalitis-induced in
genetically diabetic mice,
*477
- glucose tolerance factor and, 49
- and lithium therapy, *497
- CARBON DIOXIDE**
in alanine metabolism, 292
- ¹⁴CARBON DIOXIDE**
production in muscle and adipose tis-
sue in high- and low-fat diet
fed rats
insulin and, 114-119
- CARCINOMA**
and L-asparaginase-induced glucose
intolerance
and immunoreactive glucagon
levels, *486
- of bladder
saccharin ban and, 878-879
- CARDIOVASCULAR DISEASE**
and tolbutamide
and inotropic action of sul-
fonylureas, 694-698
- CARDIOVASCULAR SYSTEM**
abnormal reflexes
and autonomic neuropathy, 1043
and autonomic neuropathy, 1048
- CARNITINE PALMITOYL-
TRANSFERASE**
and ketogenesis, *433
- CASE REPORTS**
glucose homeostasis in glucagonoma
syndrome, *482
- hypercalcemia with diabetes and
selective calcification of islets
of Langerhans, 620-622
- hyperchloremic metabolic acidosis in
diabetes mellitus, 16-20
- insulin resistance due to post receptor
defect, *451
- insulinoma resection
use of artificial endocrine pancreas
during, 774-777
- non-B-cell tumor hypoglycemia as-
sociated with increased non-
suppressible insulin-like pro-
tein, *498
- C-peptide measurements in hypo-
glycemia cases, 268-269
- CATARACTS**
diabetic
glycosylation of lens crystallins in,
*434
- CATECHOL-O-METHYLTRANSFERASE**
in obese hyperglycemic mice, 389-394
- CATECHOLAMINES**
and glucose homeostasis, 554-561
- production
in obesity and diabetes, 389
- CATHETERIZATION**
in splanchnic glucose balance studies
in diabetics, 122
- CAUCASIANS**
frequency distributions of glucose
levels in, 793, 798, 799
- CELLS**
plating efficiency
in juvenile diabetes, 338-341
- CELLULAR GROWTH DEFECT
HYPOTHESIS**
and cultured skin fibroblast viability
study in juvenile diabetics,
338-341
- CHEMOTAXIS**
in diabetes, 679
- CHICKENS**
embryo
differentiation of endocrine pan-
creas in, *478
- obese
IgA deficiency in, 1096
- CHILDREN**
chemical diabetes in
glucose, insulin and growth hor-
mone studies in, 909-914
- with cystic fibrosis
hypersecretion of gastric inhibitory
polypeptide after oral glucose
in, *501
- diabetes classification in, 1113-1120
- diabetes prevalence studies
in Minnesota schools, 57-59
- hyperinsulinism diagnosis in
glycemic response to glucagon and,
*475
- CHINESE HAMSTER**
ketotic diabetic
autonomic neuropathy in, *435
- and gastrointestinal tract abnor-
malities, *475
- nondiabetic and spontaneously dia-
betic glucose, insulin and
glucagon levels in, *514
- spontaneously diabetic
glomerular capillary basement
membrane thickening in,
*446
- CHLORPROPAMIDE**
and glucose, insulin and glucagon re-
sponses to mixed meal in dia-
betics, *478
- inhibition of phosphodiesterase, *487
- therapy
beta-cell function during, 241-246
- CHOLESTEROL**
absorption and sterol balance in dia-
betes, *448
- and glycosylated hemoglobins in insu-
lin dependent diabetics, *505
- high density lipoprotein
in juvenile-onset diabetics, *447
- in insulin-treated diabetics and con-
trols, 1080-1082
- levels
in diabetics with femoral disease,
*448
- metabolism
diabetic control and, 1059-1064

- CHOLINE**
-free diet
and carbohydrate metabolism in rats, *506
- CHOLINERGIC STIMULATION**
of sympathetic nervous system in diabetic and normal subjects, *487
- CHROMATOGRAPHY**
affinity
of serum somatostatin-like immunoreactive substance, 525, 526, 527
agarose gel
and analysis of normal and diabetic rat glomerular basement membrane, *471
cation exchange on Amberlite LRC-50 column
and hemoglobin assays, 1183-1188
column
and isolation of proinsulin from insulin, 161-169
lactate isolation by, 289
comparative studies of glycosylated hemoglobin determinations with, 106
DEAE-cellulose
of rat immunoglobulin in diabetic rats, 36
gas-liquid
and ethanol and acetaldehyde level determinations, 129-130
gel
of serum somatostatin-like immunoreactive substance, 525, 526-527
liquid
for hemoglobin A_{1c} determinations, 102-106
Sephadex G-25
of serum somatostatin-like immunoreactivity, 526-527
thin-layer
in barbituric interaction with alloxan study, 73
of serum somatostatin-like immunoreactivity, 525
- CHROMIUM**
in glucose tolerance factor fractions
biologic activity vs. content in, 52-56
determination of, 51-52
- CINERADIOGRAPHY**
and esophageal motor abnormalities, 1045-1046
- CIRCULATION**
forearm hemodynamics and responses to exercise in middle-aged adult-onset diabetics, 726-731
- CIRRHOSIS**
hepatic
proinsulin metabolism in, *498
and C-peptide and insulin metabolism, 201-206
- CITRIC ACID CYCLE SUBSTRATES**
and prostaglandin effects on glucagon and insulin release from rat pancreas in vitro, 803
- CLINITEST**
compared with other urine glucose determination methods, 810-816
- CLONIDINE**
-induced insulin secretion
and impaired glucose tolerance, 554-561
- CLONING**
of rat preproinsulin DNA fragments in bacteria, *455
- COLCHICINE**
and glucose-induced insulin secretion and glucose tolerance in rats, 925-929
- COLLAGENASE**, 72
and insulin release and cyclic AMP content in cultured islets, 770-771
- COMA**
hypoglycemic with ketoacidosis in nondiabetic alcoholics, *465
- COMPUTERS. See** Mathematical models
- CONCAVALIN A**
binding to isolated rat islets
in pancreas islet is transplantation studies in rats, 627, 629, 630
insulin-like effects, *509
and pyruvate dehydrogenase in mouse adipose tissue, *502
- CONGENITAL MALFORMATIONS**
in infants of diabetic mothers, *464
- CORONARY ARTERY DISEASE**
plasma glucose and immunoreactive insulin after oral glucose loading in patients with and without, *477
- CORTISOL**
islet response to
in stressed, fasted diabetic islet transplanted rats, 820-821
in stress hyperglycemia and diabetic ketoacidosis, *504
- COXSACKIE-B4 VIRUS**
and diabetes development, 1128-1129, 1130-1131
- CREATININE CLEARANCE RATES**
and diabetic glomerulopathy following unilateral nephrectomy in streptozotocin diabetic rats, 35, 36
- CYCLIC ADENOSINE 3',5'-MONOPHOSPHATE**
and glucose-induced insulin release in cultured rat pancreatic islets, 766-772
and inotropic action of sulfonylureas, 694-698
and insulin inhibition of lipolysis in human adipocytes, *469
- CYCLIC IMP**
and insulin action, *499
- CYCLIC SOMATOSTATIN**
effect on arginine-stimulated glucagon secretion in perfused islets of high-protein-fed rats, 371-373
- CYSTIC FIBROSIS**
and hemoglobin A_{1c} synthesis by erythrocytes, *433
and hypersecretion of gastric inhibitory polypeptide after oral glucose, *501
- CYTOCHALASIN B**
binding site in rat adipose cell plasma membranes, *453

SUBJECT INDEX 1978

- and hypercalcemia
 - with selective calcification of pancreatic islets of Langerhans, 620-624
- and hypercalciuria
 - insulin and, *433
- hyperchloremic metabolic acidosis in, 16-20
- hyperglucagonemia and blood glucose levels and insulin requirements in, 649-652
- and hypertriglyceridemia
 - hepatic triglyceride secretion measurement in, *448
- and immunologic insulin resistance
 - sulfated insulins and, 308-317
- and infection
 - and plasma glucose levels, *436
 - and insular amyloid, 357
 - and insular amyloidosis in *Macaca nigra*, 357-363
- and insulin
 - and time course of regular and NPH insulins, *439
- and insulin absorption study
 - with and without insulin pads, *485
- insulin-dependent
 - complex carbohydrates and plasma glucose in, *443
 - glycosylated hemoglobin related to cholesterol and low density lipoprotein cholesterol in, *505
 - growth hormone levels and glucose variability in, *480
 - killer cell activity in, *459
 - and residual beta-cell function related to age at onset and diabetes duration, 262-264
- and insulin infusion
 - and plasma phosphate, *500
- insulin resistant
 - and adipocyte metabolism, 938-944
- and insulin therapy
 - and circulating C-peptide levels, 235-240
- insulin, C-peptide, and proinsulin in, 178-183
- metabolic response to glycemic control by artificial endocrine pancreas in, *431
- pancreatic polypeptide antibodies in, *466
- and plasma immunoreactive glucagon, 411-418
- serum lipids and lipoproteins in, 1078-1085
- triglyceride patterns in, *444
- and intermittent endogenous hyperglucagonemia
 - glucose metabolism and, *455
 - and intraperitoneal insulin delivery system, *439
 - and ischemia of lower extremity femorotibial bypass in, *448
 - and islet cell studies in mice, 1-6
 - juvenile, *see* Juvenile diabetes
 - juvenile-onset
 - antibodies to nucleic acids in, 1105-1110
 - and heart disease, *488
 - high density lipoprotein cholesterol and microangiopathy in, *447
 - and hypoglycemic potentiation of glucagon secretion, *495
 - and Mauriac syndrome, somatomedin deficiency in, *479
 - role of glucagon, epinephrine and cortisol in stress hyperglycemia and diabetic ketoacidosis in, *504
 - juvenile-onset, insulin-dependent
 - genetics of, *459
 - HLA typing in black subjects with, *458
 - segregation patterns in, *458
 - and ketogenic activity of growth hormone, 916-923
 - ketosis-prone
 - insulin receptors on monocytes from patients with, 1098-1103
 - kidney size changes in, *432
 - latent
 - lipid levels and peripheral arterial disease in, *448
 - and paradoxical release of growth hormone during oral glucose tolerance tests, *479
 - management
 - assessment by determination of glycosated hemoglobins, 931-937
 - team approach to, *437
 - of unstable patients, *438
 - maturity-onset
 - gastric inhibitory polypeptide response to modest meal ingestion in, *472
 - glycosylated hemoglobin levels in, 834-838
 - insulin resistance in, *431
 - obesity and, insulin binding to monocytes in, 1175-1181
 - and somatostatin infusion effects on plasma free fatty acids, glucagon, insulin, glucose and growth hormone, 1013-1018
 - and splanchnic glucose balance after oral glucose ingestion, 121-126
 - untreated, and motor nerve conduction velocity, *435
- maturity-onset, insulin-dependent
 - gastric inhibitory polypeptide response to hyperglycemia and hypoglycemia in, *500
- in mice
 - and arteriolar alterations, *445
 - and studies of natural and synthetic glucose tolerance factor, 49-56
 - and sympathetic nerve function, 969-974
 - and T-lymphocyte immunoblast proliferation, *459
 - and Venezuelan encephalitis-induced metabolism defects, *477
- in middle-aged adult onset patients
 - forearm hemodynamics and responses to exercise in, 726-731
- mild
 - effect of gastric inhibitory polypeptides on insulin secretion in, 849-854
- and morbid obesity
 - and gastric bypass, *498
- morphometric studies of skeletal muscle capillaries and pericytes in, *445
- mortality
 - and pancreatic lymphocytic infiltrates, 1092
- myocardial performance and
 - effect of alcohol administration on, 127-133
- and nephropathy
 - and specificity of increased albumin concentrations in basement membranes in, *446
- and neuropathy
 - and motor nerve conduction velocity and dietary myoinositol studies, *436
- and nonhypoglycemic insulin reactions, *489
- non-insulin dependent
 - and effect of triglyceride and galactose ingestion on gastric inhibitory polypeptide secretion and responses to intravenous glucose, 327-333
- non-uremic azotemic
 - normal exercise tolerance in, *501
- and oral hypoglycemic agents
 - islet cell antibodies and prediction

SUBJECT INDEX 1978

- of failure with, *483
 - and organic sexual dysfunction
 - and plasma prolactin and testosterone study, *515
 - pancreatic islet cell transplantation in, 427-429
 - pathogenesis of
 - viruses and, 1126-1136
 - patient education programs survey, *444
 - and peripheral arteriosclerotic disease
 - high density lipoprotein cholesterol levels in, *516
 - persistent islet cell antibodies in
 - and C-peptide assays for islet cell function, 265-266
 - and phosphodiesterase, *505
 - in Pima Indians
 - and islet-cell antibodies and HLA typing in, *460
 - plasma glucagon response to oral glucose loading in, 1145-1150
 - plasma pancreatic polypeptide in, 96
 - platelet hyperaggregability and prostaglandin E₁-like production in
 - decreased platelet vitamin C and, *447
 - platelets from patients with
 - prostaglandin E production by, *501
 - poorly controlled
 - impaired granulocyte adherence in, 677-681
 - prevalence
 - in Pima Indians and Nauruans, 793
 - in school-age children in Minnesota, 57-59
 - in U.S. civilian noninstitutionalized population under 17 years of age, 57
 - in rats
 - pancreatic transplantation and nutritional and biochemical studies in, *493
 - reduced erythrocyte deformability in, 895-901
 - and renal transplantation
 - and plasma glucagon and serum creatinine, *493
 - and replicative capacity of cultured skin fibroblasts, *459
 - and residual beta cell function
 - and C-peptide assays, 226-229
 - reversal in rats
 - and pancreatic islet islet transplantation, 625-630
 - screening
 - mass indiscriminate, 377-383
 - urine glucose methods compared for, 810-816
 - serum antifungal precipitins in, *466
 - spontaneous
 - in guinea pigs, 1130
 - and surgery
 - use of artificial beta cell during, *431
 - and sympathetic nervous system function, *487
 - therapy
 - hospital admission diagnoses related to, *473
 - uncontrolled
 - plasma vasopressin in, *432
 - unstable
 - metabolic control in inpatient and outpatient periods, *438
 - urinary proteins in, *490
 - and vascular disease
 - and circulating immune complexes, *486
 - and weight reduction
 - and recovery of late phase insulin secretion, *502
- DIALYSIS
 - peritoneal
 - and intraperitoneal insulin delivery, *439
- DIAPHRAGM
 - of low- and high-fat diet fed rats
 - responsiveness to insulin, 114, 116, 118-119
- DIARRHEA
 - after jejunoileal bypass surgery
 - medications for, 79
- DIARRHEA, DIABETIC
 - and autonomic neuropathy, 1047-1048
- DICHLOROACETATE
 - and glucose and amino acid metabolism in perfused rat skeletal muscle, 1065-1073
 - and plasma lactate and alanine, *494
- DIET
 - and biochemical and histologic examination of endocrine pancreas in rats, *473
 - brewer's yeast in
 - glucose tolerance and, 56
 - carbohydrate free
 - and glucagon effect upon diabetic hyperglycemia, *455
 - carbohydrates
 - effects on plasma glucose in normal subjects and insulin-dependent diabetics, *443
- choline free
 - and carbohydrate metabolism in rats, *506
- corn oil
 - immunoreactive gastric inhibitory polypeptide secretion and, 853-855
- in diabetes and cholesterol metabolism study, 1060
- diabetic
 - assessment of patient compliance with, *443
- food intake
 - association with behavior, *469
- fructose, sucrose, and glucose in hypoglycemia patients, *438
- high carbohydrate
 - and very low density lipoprotein composition and structure in rats, 1215-1227
- high carbohydrate, high fiber
 - in insulin-treated diabetic men, *443
- high-protein
 - and amino acid stimulation of glucagon secretion by perfused islets of rats, 370-376
- induced changes in sympathetic activity in mice
 - ventromedial hypothalamus and, *515
- induced ketosis
 - hypoglycemia and, 1087-1091
 - and insulin binding to monocytes in obese diabetics, 1176, 1178-1179
- low carbohydrate
 - and pancreatic insulin and severity of diabetes in rats, *504
- low- and high-fat in rats
 - and in-vitro and in-vivo responsiveness of muscle and adipose tissue to insulin in, 114-119
- low and high myoinositol
 - and motor nerve conduction velocity in neuropathic diabetics, *436
- meal ingestion in maturity-onset diabetics
 - gastric inhibitory polypeptide response to, *472
- mixed meal
 - glucose, insulin, and glucagon responses in diabetics to, *478
 - and idiopathic reactive hypoglycemia, *481
- during pregnancy

 - American Diabetes Association policy statement on, 877-878
 - renal
 - in diabetic rats, *481
- DOGS
 - alloxan diabetic
 - and plasma somatostatin-like immunoreactivity, *442
 - differential localization of glucagon- and gastric inhibitory polypeptide-containing cells of intestine and pancreas in, *441
 - efficacy of insulin suppositories in, *514
 - epinephrine enhancement of
- potassium-stimulated immunoreactive insulin secretion in, 550-553
- fasted
 - McN-3495 studies in, 859, 861-862
- glucagon and control of glucose production during exercise in, *454
- and glucagon deficiency
 - maintenance of glucose production and, *454
- glucose disappearance rates in acetylsalicylic acid and, *467
- glucose tolerance tests in
 - and McN-3495 compared with biguanides, 869, 870
- indomethacin augmentation of insulin and glucagon release in, *470
- injection of insulinotropic substances into pancreatic artery of
 - early time courses of insulin release following, 1189-1195
- insulin secretion inhibition by somatostatin and reversal by glucose infusion in, *442
- insulin secretion in pancreatic vein after enteric glucose load in, 21-26
- islets of Langerhans
 - and inhibition of somatostatin release by somatostatin analogs in, *443
- isolated perfused stomach
 - gastric glucagon release study in, *487
- jejunal or ileal resection in
 - functional alteration of islet cells after, 1156-1165
- nasal absorption of insulin in, 296-299
- pancreas
 - regional concentration and in-vitro secretion of pancreatic polypeptide, insulin, and glucagon by, 96-101
- pancreatectomized
 - and portable insulin delivery system, *439
- pancreatic polypeptide concentration
 - distribution and localization studies in, *479
- proinsulin C-peptide synthesis, 152-155
- renal cell membrane insulin receptors, 88-94
- somatostatin infusion in
 - gastric inhibitory polypeptide effects on glucose turnover during, *499
- ventriculo-cisternal perfusion in

acute hypoglycemia and ¹⁴C-palmitate removal during, *476

DOPAMINE
pancreatic islet concentrations, *516

L-DOPAMINE
glucagon response to, in normal and diabetic subjects
glucose and, 396-399
and metoclopramide
pancreatic polypeptide response to, *506

DOPAMINE- β -HYDROXYLASE
activity
in peripheral sympathetic nerves of diabetic mice, 970, 971-972

DUCK
proinsulin C-peptide synthesis, 152-155

DWARFISM
and Mauriac syndrome
somatomedin deficiency and, *479

E

ECHOCARDIOGRAMS
in diabetics, 128-133

EDTA
in pancreatic islet perfusions, 612

EDUCATION
on diabetes
and medical students, *445
and diabetic compliance with diet, *443
of diabetics
influence of groups and leadership on, *445
for juvenile diabetics
curriculum for, *444
patient teaching programs survey, *444

EEL
swim bladder rete mirabile blood capillary preparation
glucose-induced alterations of metabolism in, 108-112

5,8,11,14-EICOSOTETRAYONIC ACID
and platelet aggregation, 346

SUBJECT INDEX 1978

- ELECTRICAL ACTIVITY**
in mouse pancreatic B-cells
suppression by mitochondrial inhibitors, *466
tetra-ethyl-ammonium and potassium permeability and, *500
of pancreatic beta cells
in potassium permeability studies, *457
- ELECTROCARDIOGRAMS**
in non-uremic azotemic diabetics
exercise and, *501
- ELECTROLYTES**
and renal insulin binding, 94
- ELECTROPHORESIS**
agarose-urea gel
of fish islet mRNA, *456
polyacrylamide gel
of rat uterine AMY, 633
of rat adipocyte plasma membranes, *453
- SDS-PAGE**
and proteinuria determinations, *490
- slab-gel**
and identification of preproinsulin
in pancreatic islets and insulin
producing tumors, *455
- EMBRYO. See also Fetus chick**
differentiation of endocrine pancreas of, *478
- ENCEPHALOMYOCARDITIS VIRUS**
and diabetes development, 1129-1130, 1131-1132
- ENDOCRINE GLANDS**
in evaluation of reproductive system of
young adult diabetics, *493
functions
somatostatin and, 300
functions in diabetes, *474
- ENDOTHELIAL CELLS**
cultured human
hexose transport and sorbitol accumulation in, *446
- ENZYMES**
of adenylate cyclase-cyclic AMP system
during fasting, *489
aldose reductase
immunohistochemical localization
in rat, *463
in retinal and cerebral microvessels, *475
angiotensin-converting activity in diabetics, *471
dehalogenase
and deiodination of iodinated insulin tracer in vivo, *505
dopamine-B-hydroxylase and monoamine oxidase activity in peripheral sympathetic nerves of diabetic mice, 970, 971-972
glycogen synthase phosphatase activation in rat heart, *476
liver cholecalciferol 25-hydroxylase of vitamin D₃ in streptozotocin diabetic rats, *432
liver phosphorylase kinase purification and characterization of, *474
ornithine decarboxylase
insulin and regulation of, *501
phosphodiesterase
activator protein for, *487
pyruvate dehydrogenase
activation in mouse adipose tissue, *502
- EPINEPHRINE**
and adipocyte calcium uptake, *491
effect on plasma glucose, insulin and glucagon in islet transplanted stressed diabetic rats, 819-820
and glucose turnover and free fatty acid levels, *478
-induced platelet aggregation
in juvenile diabetics, *496
and insulin secretion
and calcium, *490
interaction with insulin releasers, 319-326
and potassium-stimulated immunoreactive insulin secretion
role of beta-adrenergic receptors in, 550-553
in stress hyperglycemia and diabetic ketoacidosis, *504
- EQUILIBRIUM BINDING ASSAY**
of insulin antibodies, 653-659
- ERRATUM**
in *Diabetes*, 143, 356, 1144
- ERYTHROCYTE SEDIMENTATION RATE**
of patients in glucose tolerance and viral hepatitis study, 662
- ERYTHROCYTES**
aggregation
in juvenile diabetics, *496
deformability in diabetes *463, 895-901
glycosylated hemoglobin
in normal subjects and diabetics, 834-838
hemoglobin A_{1c} synthesis by, *433
insulin receptors of, 701-708
- ESCHERICHIA COLI K12**
in recombinant DNA research, 877
- ESOPHAGUS**
autonomic neuropathy and, 1045-1046
- ESTROGEN**
and tissue lipoprotein lipase in rats
nutritional state and, *507
- ETHANOL**
and insulin release from isolated rat islets, *505
- EXERCISE**
glucose production during
glucagon and, *454
and hemoglobin A_{1c} and blood lipids
in juvenile diabetics, *436
-induced acceleration of glucose uptake into muscle, *472
and insulin binding in monocytes, *449
in insulin-treated juvenile diabetics
skeletal muscle adaptations during, *471
in non-uremic azotemic diabetics, *501
and peripheral and splanchnic arteriovenous alanine differences, 287
and plasma pancreatic polypeptides, *468
responses to, in middle-aged adult-onset diabetics, 726-731
- EYE**
accumulation of fluorescein in diabetic rats
portal vein transplanted islets and, *435
blood-retinal barrier breakdown in young diabetics
quantitative vitreous
fluorophotometry measurement technique, 85-87
diabetic cataractogenesis

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

April, 357-430		December, 1145-1232

SUBJECT INDEX 1978

glycosylation of lens crystallins in, *434
 lesions in alloxan diabetic rats
 prevention by pancreas transplantation, *446
 microvascular disease
 correlation with hemoglobin A₁ levels, *434

F

FAMILY HISTORY

and genetic heterogeneity of diabetes, 1113-1120
 and genetics of diabetes, *459
 and genetics of juvenile diabetes, *459
 of HLA types, *511
 and interactions of obesity and glucose-stimulated insulin secretion in familial hypertriglyceridemia, 682-692
 of juvenile diabetics
 in cultured fibroblast viability study, 338
 and repeated intravenous and oral glucose tolerance tests in offspring of conjugal diabetic parents, 715-725
 in segregation analysis of juvenile-onset insulin-dependent diabetics, *458

FASTING

and alanine and glucose production rates, 420-426
 and bimodality of two-hour glucose tolerance distributions in Micronesian population, 793-799
 and blood glucose levels
 age and, 543
 by diabetic islet transplanted rats
 islet response to, 820-821
 and hyperthyroidism
 and ketonemia, *504
 and insulin, C-peptide and proinsulin in nondiabetics and insulin-treated diabetics, 178-183
 insulin release in
 protein phosphorylation and, *489
 maternal
 humorally mediated fetal adaptation to, *503
 and peripheral and splanchnic arteriovenous alanine differences, 287
 in pregnancy
 and "accelerated starvation," *463
 in pregnant rats in third trimester

and stimulation of adrenal medulla and suppression of sympathetic nerves, *486
 in rats
 and glycogen synthase phosphatase, *476

FAT CELLS. *See also* Adipocytes

insulin degradation
 time course of, *482
 rat
 insulin binding studies on, *450
 of streptozotocin diabetic rats
 amino acid utilization in, *479

FATTY ACIDS

free
 in diabetic ketosis, *432
 epinephrine and, *478
 in fasting hyperthyroid patients, *504
 during glucose tolerance tests in obese diabetic Pima Indians, *462
 and growth hormone administration in diabetics, 920-921
 hepatic uptake of, fructose infusion and, 711, 712
 oxidation, and McN-3716, *438
 in viral hepatitis patients, 665-666
 hepatic synthesis and oxidation of and ketogenesis, *433

FECAL STEROID BALANCE

diabetic control and, 1061-1064

FEMORAL ARTERY

blood supply to
 impotence and, 978, 979

FETUS

adaptation to maternal fasting
 humoral mediation of, *503
 baboon
 acetoacetate uptake by, *488
 glucose turnover
 and maternal hypoglycemia, *463
 human
 islets of Langerhans studies in, *477
 maternal circulation to
 insulin and regulation of, 530
 pancreas islets
 glucose-initiated efflux of phosphate ions in, 611-618
 pancreatic transplants in alloxan diabetic rats
 insulin effect on growth of, *492
 rat

hyperinsulinism, placental role in, *462

rat pancreas

developmental pattern of somatostatin, glucagon and insulin in, *473
 transplantation into alloxan diabetic rats, 982-986, 988-994
 rat pancreas cultured islets
 phosphate metabolism and maturation of insulin release in, *456
 transplantation into normal and diabetic rats, insulin content and release studies, *512
 rat pancreas islet cells
 differentiation in vitro, *500

FIBRINOLYSIS

diabetes and, 346

FIBROBLASTS

cultured human skin
 effects of glucose and sorbitol on proliferation of, 583-587
 from juvenile diabetics, viability studies of, 338-341
 and pancreatic beta cell function, *440
 replicative capacity in diabetes and prediabetes, *459

FIBROSARCOMA

hypoglycemia secondary to nonsuppressible insulin-like protein secreted by, *433

FISH

proinsulin mRNA purification
 and synthesis of complementary DNA, *456

FLUOROGRAPHY

and identification of preproinsulin in pancreatic islets and insulin producing tumors, *455

FLUOROPHOTOMETRY STUDIES

of chemical interaction between alloxan and barbituric acid, 76
 and ocular accumulation of fluorescein in diabetic rats
 portal vein transplanted islets and, *435
 quantitative vitreous and aqueous humor
 as technique for measuring early blood-retinal barrier breakdown in young diabetics, 85-87

 December, 1145-1232

SUBJECT INDEX 1978

FOOT-AND-MOUTH-DISEASE VIRUS

and diabetes development, 1130

FREUND ADJUVANT

in insulin immunogenicity studies in several animal species, 8-14

FRUCTOSE

antiketogenic action in man, 709-713
compared with sucrose and glucose in reactive hypoglycemia, *438
content of blood capillary preparation from eel swim bladder
glucose and, 108-112
immediate insulin-secretory response of perfused rat pancreas to, 32

G

GALACTOSE

and hemoglobin A_{1c} synthesis by erythrocytes, *433
ingestion in normal and diabetic subjects
and gastric inhibitory polypeptide secretion and responses in intravenous glucose, 327-333

GASTRIC INHIBITORY POLYPEPTIDE

atropine and, 638-641
-containing cells in gastrointestinal system and pancreatic tissue differential localization of, *441
effect on glucose-induced insulin secretion in mild diabetes, 849-854
glucose-stimulated
effect of atropine on, 638-641
and glucose turnover during somatostatin infusion in dogs, *499
hypersecretion
after oral glucose in children with cystic fibrosis, *501
and insulin secretion, 783-785
response to hyperglycemia and hypoglycemia in insulin-dependent, maturity-onset diabetics, *500
response to meal ingestion in maturity-onset diabetics, *472
secretion in normal and diabetic subjects
triglyceride or galactose ingestion and, 327-333

GASTRIN

insulin secretion and, 783

GASTROINTESTINAL SYSTEM

abnormalities in ketotic diabetic hamster, *475
autonomic neuropathy and, 1045-1048
degradation of oral insulin by, 296
gastric bypass
in morbidly obese diabetics, *498
gastric inhibitory polypeptide, *see* Gastric inhibitory polypeptide
hormones
control of insulin secretion by, 782-785
secretion in diabetics, *503
intrajejunal glucose loading in dogs
insulin-secretory response to, 21-26
intraperitoneal fibrosarcoma
and hypoglycemia associated with increased non-suppressible insulin-like protein, *498
intraperitoneal insulin delivery system, *439
jejunal or ileal resection in dogs
functional alteration of islet cells after, 1156-1165
jejunoileal and/or ileal bypass surgery and loss of insulin response to ingested amino acids, 78-83
localization of glucagon and gastric inhibitory polypeptide-containing cells in, *441
mucosa
and acetylsalicylic acid, *467
neuropathy in ketotic diabetic Chinese hamster, *435
nutrient-independent incretin release, *488
rat intestine glucose absorption and McN-3495 compared with biguanides, 871-872
very low density lipoprotein-triglyceride secretion
in insulin-deficient rats, 902-914

GEL FILTRATION

Sephadex
in insulin and proinsulin clearance studies, 404-406
of serum C-peptide, 184-191
of urine C-peptide immunoreactivity, 213

GENES

"diabetogenic," 247-250
and disease susceptibility in diabetics and HLA antigens, *511

HLA

and genetic heterogeneity in diabetes, 599-604
HLA typing of black diabetics, *458
and inbreeding of obese hyperglycemic mice with nude and thymusaplastic mice, *503
rat preproinsulin
cloned in bacteria, *455
susceptibility to diabetes and, *459

GLIBENCLAMIDE

effect on contractility in isolated atrial preparations, 694-698
-glucose loading in diabetics and C-peptide levels, 235-240
and urine C-peptide immunoreactivity, 214

GLIPIZIDE

alteration of heptic insulin receptors by, *449

GLOMERULAR FILTRATION RATE

in early juvenile diabetes, 38
in uninephrectomized rats, 40

GLOMERULOPATHY, DIABETIC

following unilateral nephrectomy in streptozotocin diabetic rats, 35-40
and mesangial smooth muscle actomyosin antigen, 632

GLUCAGON

antibodies to
in studies of islet cells of spontaneously diabetic mice, 2-6
arginine-induced release of
after jejunal or ileal resection in dogs, 1156-1165
basal
hyperlipidemia and, *478
binding
in "evanescent" effect of acute hyperglucagonemia, *453
chronic excess
hepatic metabolism and, 643-647
-containing cells in gastrointestinal system and pancreatic tissues differential localization of, *441
deficiency
maintenance of glucose production during, *454
developmental pattern in fetal and neonatal rat pancreas, *473
gastric release in isolated perfused dog stomach

SUBJECT INDEX 1978

- noradrenaline and arginine and, *487
- glucose production during exercise and, *454
- glycemic response to
diagnosis of hyperinsulinism and, *475
and hepatic glucose storage blockade during insulinopenia, *454
and hyperglycemia, *455
hypersecretion in juvenile diabetics
somatostatin and, 300-305
immunoreactive
and L-asparaginase-induced glucose intolerance, *486
and fructose, sucrose and glucose ingestion by reactive hypoglycemics, *438
and insulin therapy in juvenile-type and adult-type diabetics, 411-418
responses to oral glucose, insulin infusion and deprivation, and somatostatin by pancreatectomized man, 1005-1011
-induced insulin release
epinephrine and, 322-324
and insulin release and cyclic AMP content of cultured and fresh islets, 769-770
- levels
during anesthesia and surgery in normal and diabetic patients, *492
in diabetic and nondiabetic Chinese hamsters, *514
regional concentration and in-vitro secretion by dog pancreas, 96-101
- release
alpha adrenergic agonism and, *502
from human fetal islets of Langerhans, *477
and indomethacin, *470
from islet cell suspensions in vitro, *474
and morphologic changes of A-cells, *458
release from perfused rat pancreas
prostaglandins and, 801-808
calcium inhibition by verapamil and, 996-1003
replacement after pancreatectomy and hyperaminoacidemia, *454
response to L-dopa in normal and diabetic subjects
glucose and, 396-399
response to mixed meal in chlorpropamide-treated diabetics, *478
- responses during oral glucose tolerance tests
in diabetics controlled with artificial beta cell, *431
- secretion
amino acid stimulation of, in perfused islets of high-protein-fed rats, 370-376
aspirin and, 1196-1202
by guinea pig islets of Langerhans, inhibitors of, *490
in hyperthyroidism, *480
and hypoglycemia in nondiabetics and juvenile-onset diabetics, *495
of islets transplanted intraportally in diabetic rats, 817-823
from isolated perfused rat pancreas, somatostatin analogs and, *496
in protein-fed rats, *475
-specific analog
and glucose homeostasis during arginine infusion, *489
stimulated immunoreactive insulin secretion
epinephrine infusion and, 550
in stress hyperglycemia and diabetic ketoacidosis, *504
- ¹²⁵I-GLUCAGON
binding to hepatocytes during liver perfusion, *491
binding by liver membranes from young and adult rats, 589-591
- GLUCAGONOMA SYNDROME
glucose homeostasis in, *482
and hepatic metabolism, 643-647
- GLUCONEOGENESIS
plasma alanine and, *461
precursor release
and dichloroacetate, 1068-1069, 1071-1072
in primary rat hepatocyte cultures, *509
role of alanine in, 287, 294
- GLUCOSAMINE
metabolism and insulin-releasing capabilities, *515
- GLUCOSE
accumulation in adipose cells of aged, obese rats, *462
and amino acid metabolism, *461
and arginine-stimulated glucagon secretion in perfused islets of high-protein-fed rats, 371-373
balance, splanchnic
and glucose ingestion in maturity-onset diabetics, 121-126
basal
and acute insulin responses in man, *497
and calcium binding in islet cell plasma membranes, *494
capillary and urinary
hemoglobin values and, *434
circulating
in diabetes, 420-426
and insulin hypoglycemia, *502
compared with fructose and sucrose in reactive hypoglycemia, *438
and cyclic AMP content of pancreatic islets, 766
delayed pancreatic response to, 1039
deprivation
hypothermia and food and water intake and, *507
disappearance rates
mathematical model of, in estimates of insulin sensitivity, *468
disappearance rates in dogs
an acetylsalicylic acid, *467
and efflux of phosphate ions in fetal islets
phosphate metabolism and, 611-618
enteric loading in dogs
uniphasic insulin-secretory response in pancreatic vein after, 21-26
and glucagon response to L-dopa in normal and diabetic subjects, 396-399
and growth hormone
in insulin-dependent juvenile diabetics, *513
and hemoglobin A_{1c} synthesis by erythrocytes, *433
and hepatic pyruvate metabolism, *491
hepatic storage of
glucagon blockade during insulinopenia in diabetics and, *454
homeostasis
during arginine infusion, influence of somatostatin and glucagon-specific analog on, *489
in chemical diabetes, 912
in diabetic rats with intraportal islet transplants, 817-823
and fibrosarcoma, *433
in glucagonoma syndrome, *482
and syngeneic fetal pancreas trans-

SUBJECT INDEX 1978

- plantation in alloxan diabetic rats, 983-986
- hypotonic
 - and acute water intoxication in mice, 61-63
 - and impaired granulocyte adherence in poorly controlled diabetes, 678
- induced alterations in metabolism of blood capillary preparation from eel swim bladder rete mirabile, 108-112
- induced biphasic insulin release
 - calcium and, *456
 - and vitamin A, *470
- induced glucagon and insulin release
 - verapamil and, 997-998
- induced insulin release
 - arginine and, 320-321, 323, 324-326
 - barbituric-acid protection against alloxan inhibition of, 71-76
 - and cations in pancreatic islets, *483
 - during colchicine treatment of rats, 925-930
- induced insulin secretion in mild diabetes
 - effect of gastric inhibitory polypeptide on, 849-854
- infusion in premature infants
 - amino acid infusion and, 334-337
- infusion during surgery
 - and artificial beta cell, *431
- injection into pancreatic artery of dogs
 - early time course of insulin release and, 1189-1195
- and insulin and glucagon release from isolated perfused rat pancreas, 801-808
- and insulin release and cyclic AMP content of cultured and fresh islets, 769-770
- insulin response to
 - route of administration and, 78
 - sodium salicylate and, 750-755
- intravenous, response to in normal and diabetic subjects
 - triglyceride or galactose ingestion and, 327-333
- levels
 - in diabetic and nondiabetic Chinese hamsters, *514
- loading
 - in patients with and without coronary artery disease, plasma glucose and immunoreactive insulin after, *477
- oral
 - in children with cystic fibrosis, gastric inhibitory polypeptide hypersecretion after, *501
 - in hyperthyroid patients, blood glucose and serum insulin levels after, 543
 - and immunoreactive glucagon responses in pancreatectomized patients, 1005-1011
 - in normal subjects, blood glucose and serum insulin levels after, 545
- oral loading in treated diabetics
 - plasma glucagon responses to, 1145-1150
- and pancreatic islet GSH:GSSG and NADPH:NADP ratios, *466
- peripheral uptake
 - in mathematical model of glucose-insulin homeostasis, 1031
- production
 - during exercise, glucagon and control of, *454
 - maintenance during glucagon deficiency, *454
 - and proliferation of cultured human skin fibroblasts and arterial smooth-muscle cells, 583-587
- rat pancreas, immediate insulin-secretory response to
 - compared with tolbutamide and other secretagogues, 27-33
- response to mixed meal in chlorpropamide-treated diabetics, *478
- and reversal of somatostatin inhibition of insulin secretion in dogs, *442
- secretion
 - and prostaglandin synthesis inhibitors, *490
- sparing for fetal use in pregnancy, *464
- stimulated ⁴⁵Ca uptake in isolated rat islets, 365-369
- stimulated gastric inhibitory polypeptide
 - atropine and, 638-641
- stimulated immunoreactive insulin secretion
 - epinephrine infusion and, 550
- stimulated insulin secretion
 - interaction with obesity in familial hypertriglyceridemia, 682-692
- stimulated lactate production
 - in isolated rat islets of Langerhans, *511
- stimulation of human fetal islets of Langerhans, *477
- transport
 - in adipose cells, *453
 - in muscle from aged obese rats, *472
- transport in rat adipocytes
 - and antibodies against hexose transport, *460
 - coupling between insulin receptors and, *452
- turnover
 - epinephrine and, *478
 - glucose infusion and, *461
 - during somatostatin infusion in dogs, gastric inhibitory polypeptide effects on, *499
- uptake into muscle
 - work and hypoxia-induced acceleration of, *472
- uptake by placenta
 - insulin and, 530
- uptake into skeletal muscle
 - prostaglandins and bradykinin-induced acceleration of, *512
 - during starvation, *462
- urinary
 - comparison of methods used for determination of, 810-816
- utilization by skeletal muscle
 - proximity to burn wound and, *508
- GLUCOSE-ARGININE TEST
 - during remission phase of juvenile diabetes, 671, 672
- GLUCOSE DISAPPEARANCE RATE
 - and acute-phase immunoreactive insulin responses, 854
- GLUCOSE-INSULIN HOMEOSTASIS MODEL, 1027-1040
- GLUCOSE INTOLERANCE
 - in acute uremia, 571-575
 - L-asparaginase-induced
 - and immunoreactive glucagon, *486
 - in hyperthyroid patients
 - age and, 543-548
 - after hypoglycemia
 - adrenergic blockade and, *511
 - in Macaca monkeys
 - and hemoglobin A_{1c} assay, 1182-1187
 - mild
 - effects on immunoreactive gastric inhibitory polypeptide secretion, 852-853
 - in pancreas transplanted mice
 - immunoreactive insulin stores of transplants related to recovery from, *486
 - in Yucatan miniature swine
 - and insulin secretion, *497

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

January, 1-70	Supplement 2, 431-522	August, 793-882
February, 71-144	May, 523-610	September, 883-968
Supplement 1, 145-285	June, 611-700	October, 969-1058

April, 357-430		December, 1145-1232

SUBJECT INDEX 1978

GLUCOSE METABOLISM

- and circulating glucose recycling into glycogen, *461
- effect of adipocyte concentration on, *472
- fetal
 - and maternal hypoglycemia, *463
- in hyperthyroid patients, 546
- insulin effect on
 - in muscle and adipose tissue of rats on high-fat and low-fat diets, 114-119
- in normal and diabetic subjects
 - hyperglucagonemia and, *455
- in perfused rat skeletal muscle
 - dichloroacetate and, 1065-1073

GLUCOSE-6-PHOSPHATASE

- deficiency
 - hypertriglyceridemia and, *506

GLUCOSE TOLERANCE

- aspirin and, 1196-1202
- bimodal and unimodal frequency distributions of
 - race and, 793-799
- clonidine and, 554-561
- during colchicine treatment in rats, 925-929
- dietary supplementation with brewer's yeast and, 56
- and glycosylated hemoglobins, *488
- lithium and, *497
- slightly impaired
 - and size of loading dose in oral glucose tolerance test, 42-48
- and triglyceride or galactose ingestion, 327-333
- in viral hepatitis patients, 661-668

GLUCOSE TOLERANCE FACTOR

- bioassay of, 51
- chromium content, 51-52
 - biologic activity related to, 52-56
- natural and synthetic
 - comparison and effects in normal and genetically diabetic mice, 49-56

GLUCOSE TOLERANCE TESTS

- during acute phase of viral hepatitis, 661
- in alloxan diabetic rats with syngeneic fetal pancreas transplants, 984-986
- in chemical diabetes, 910, 911
- comparison of methods used in, 810-816
- in dogs

- and McN-3495 compared with biguanides, 869, 870
- double intravenous
 - during remission phase of juvenile diabetes, 673
- free fatty acids in obese diabetic Pima Indians during, *462
- of human growth hormone treated genetically obese mice, 884-887
- intravenous
 - in dogs after jejunal or ileal resection, 1157-1160
 - in *Macaca nigra* monkeys, 358
 - and mathematical model of glucose-insulin homeostasis, 1028
 - in obese diabetics and nondiabetics, 1177-1181
- intravenous, in uremic rats
 - insulin resistance studies in, 571-575
- intravenous and oral
 - reproducibility and comparative analysis of, 715-725
- for mass indiscriminate diabetes screening, 377-383
- in normal subjects
 - and variations in source and amount of dietary carbohydrate, 1020-1025
- oral
 - in diabetics controlled with artificial beta cell, glucagon secretion during, *431
 - hypoglycemic symptoms during, blood glucose levels and, *484
 - idiopathic reactive hypoglycemia and, *481
 - loading dose size and results of, 42-48
 - in obese patients, *465
 - paradoxical release of growth hormone in latent diabetics during, *479
 - plasma and urine C-peptide immunoreactivity during
 - in diabetics and nondiabetics, 211
 - in viral hepatitis, 662

D-GLUCOSE

- and insulin and glucagon release from perfused rat pancreas
 - prostaglandins and, 802-808
- in insulin secretion study, *456
- protection against alloxan inhibition of glucose-induced insulin release by, 71
- sensitive cytochalasin B binding site

- in adipose cell plasma membranes, *453

U-¹⁴C GLUCOSE

- infusions in circulating alanine production and disposal study in healthy subjects, 287-294
- infusions in diabetic and healthy subjects, 420-426

GLUTATHIONE-INSULIN TRANSHYDROGENASE

- in primary rat hepatocyte cultures, *509

GLYBURIDE

- and insulin secretion studies, *467

GLYCERALDEHYDE

- insulin-secretory response of perfused rat pancreas to, 31-32

GLYCOGEN

- circulating glucose recycling into, *461
- hepatic synthesis of
 - in mathematical model of glucose-insulin homeostasis, 1030-1031

GLYCOGEN SYNTHASE PHOSPHATASE

- activation in rat heart, *476

GLYCOHEMOGLOBINS. *See* Hemoglobins, glycosylated

GLYCOLYSIS

- and dichloroacetate, 1069-1070

GLYCOPROTEINS

- basement membrane
 - in diabetic kidney, *471

GLYCOSAMINOGLYCAN

- synthesis by toadfish islet, *511

GOLDEN SYRIAN HAMSTERS

- and Venezuelan encephalitis virus-induced diabetes, 1132-1133

GONADOTROPIN-RELEASING HORMONE

- response to, in diabetics, *474

GRANULOCYTES

- bactericidal functions in poorly controlled diabetes, 889-894
- impaired adherence in poorly controlled diabetes, 677-681

SUBJECT INDEX 1978

GRAVES'S DISEASE
insulin secretion in, 543

GROWTH
of fetal pancreatic transplants in alloxan diabetic rats
insulin and, *492
renal
in alloxan and streptozotocin diabetic rats, *481

GROWTH FAILURE
in juvenile diabetics
and skin fibroblast viability studies, 338-341
and somatomedin deficiency in Mauriac syndrome, *479

GROWTH HORMONE
diurnal secretion patterns in chemical diabetes in childhood, 911-914
and glucose
in insulin-dependent juvenile diabetics, *513
human
and diabetogenic action in genetically obese mice, 883-887
hypersecretion in juvenile diabetics somatostatin and, 300-305
interaction with isolated rat hepatocytes, *474
ketogenic activity in diabetes, 916-923
molecular structure
diabetogenic activity and, 886-887
paradoxical release during oral glucose tolerance test, *479
response in premature infants
amino acid infusion and, 334-337
synthetic fragment with hyperglycemic properties, 597-598

GUINEA PIGS
atria
effect of sulfonylureas on, 694-698
islets of Langerhans
inhibitors of prostaglandin synthesis and glucagon secretion by, *490
liver mitochondria calcium uptake
phenethylbiguanide and, 757-764
spontaneous diabetes in, 1130

H

HAMSTER. *See also* Syrian golden hamster

pancreas monolayer cultures
effects of preparative procedures on secretions by, *476

HEARING
acuity in diabetics
insulin levels and, *485

HEART
myocardial function
and exercise in non-uremic azotemic diabetics, *501
myocardial performance in diabetics alcohol and, 127-133
norepinephrine turnover
in diabetic and nondiabetic mice, 970-971
rat
glycogen synthase phosphatase activation in, *476
systolic time intervals
in diabetics, alcohol and, 127-133
vagal control in diabetics
assessment of methods for estimating, 1167-1174

HEART DISEASE
atherosclerotic coronary
and high-density lipoprotein cholesterol levels, *447
coronary
and diabetes, 1078
risk factors, 1083
without coronary atherosclerosis in diabetics, 127
in juvenile-onset diabetics, *488

HEIGHT
of patients in glucose tolerance and viral hepatitis study, 662

HEMOGLOBIN
glycosylated
bimodal distribution in Pima Indians, *434
and cholesterol and low density lipoprotein cholesterol in insulin-dependent diabetics, *505
comparison of chromatographic determination studies, 106
and glucose tolerance, *488
glycemic events and, *434
in juvenile diabetics, *464
new technique for determination of, diabetes management assessment and, 931-937
in normal subjects and maturity-onset diabetics, 834-838

HEMOGLOBIN A₁
and assessment of pancreas beta cell reserve
and insulin antibodies effects on metabolic control in diabetics, *436
diabetic microvascular diseases correlated with, *434

HEMOGLOBIN A_{1c}
assays
isoelectric focusing and quantitative microdensitometry in, 384-388
in assessment of diabetic control, 225
and classification of control in insulin-treated juvenile diabetics, *444
and exercise by juvenile diabetics, *436
in glucose-intolerant, streptozotocin-treated or pancreatectomized Macaque monkeys, 1182-1187
measurement by liquid chromatography, 102-106
synthesis by intact erythrocytes in vitro, *433

HEPATOCYTES. *See also* Fat cells cultures
metabolism studies in, *509
isolated rat
insulin binding studies on, *450
structure-function relationships with growth hormone, *474
newborn rat liver cultures
d-propranolol action in, *508
of rat liver
insulin uptake by, *451
RNA synthesis by, insulin and, *494

HEREDITY
and clinical and etiologic heterogeneity of idiopathic diabetes, 1112-1123
and disease susceptibility gene and HLA antigens, *511
and genetic heterogeneity within juvenile-onset insulin-dependent diabetes, 599-604
and glomerular capillary basement membrane thickening in spontaneously diabetic Chinese hamsters, *446
and HLA factors associated with diabetes, 247-250
and HLA types in black juvenile-onset

November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

insulin-dependent diabetics, *458
and interactions of obesity and glucose-stimulated insulin secretion in familial hypertriglyceridemia, 682-692
and islet-cell antibodies and HLA typing in Pima Indians, *460
and juvenile-onset diabetes, *459
and obesity in rats
and intracellular defects and insulin resistance in isolated soleus muscles of, *453
and offspring of conjugal diabetic parents
and repeated intravenous and oral glucose tolerance tests, 715-725
and segregation analysis of juvenile-onset insulin-dependent diabetics, *458
and spontaneously diabetic mice, 1
and virus-induced diabetes, 1134-1135
and Yucatan miniature swine bred for glucose intolerance, *497

HEXOSE

metabolism by adipose tissue
insulin and procaine effects on, *481
transport
antibodies against, in rat adipocytes, *460
in cultured human endothelial cells, *446
uptake
insulin and, cell membrane fluidity and, *452

HISTAMINE

and neurotensin hyperglycemia in rats, 577-582

HISTAMINE RECEPTOR ANTAGONISTS

effect on neurotensin hyperglycemia in rats, 577-582

HLA ANTIGENS

and genetic heterogeneity in diabetes, 599-604, 1114
in insulin-dependent diabetics, 247-250
in juvenile diabetics, *465, *511
typing and islet-cell antibodies in Pima Indians, *460

HORMONES

circulating
and insulin hypoglycemia, *502

counterregulatory
in stress hyperglycemia and diabetic ketoacidosis, *504
gastrointestinal
control of insulin secretion by, 782-785
secretion in diabetics, *503
pancreatic
and somatostatin infusion in normals, *442
plasma prolactin and testosterone in diabetic men with and without organic sexual dysfunction, *515
and regulation of hepatic ketogenesis and triglyceride synthesis, *513

SEX

in young adult diabetics, *493
suppression by somatostatin, 1013-1018

β -HYDROXYBUTYRATE

excretion in hyperchloremic metabolic acidosis, 19
and insulin binding to lymphocytes, 539-541, 1098, 1103

HYPERAMINOACIDEMIA

glucose and, *461
after pancreatectomy
glucagon replacement and, *454

HYPERAMYLASEMIA

in diabetic ketoacidosis, *510

HYPERANDROGENISM

and hyperinsulinemia and insulin resistance
in polycystic ovarian disease, *469

HYPERBILIRUBINEMIA

in infants of diabetic mothers, *464

HYPERCALCEMIA

and diabetes
selective calcification of islets of Langerhans and, 620-624

HYPERCALCIURIA

in diabetes
insulin and, *433

HYPERGLUCAGONEMIA

and acute water intoxication in mice, 61-63
and hepatic metabolism, 643-647

effect on blood glucose levels and insulin requirements in insulin-requiring diabetics, 649-652
evanescent effect of
glucagon binding in, *453
in glucagonoma syndrome
glucose homeostasis and, *482
intermittent endogenous
and glucose metabolism in normal and diabetic subjects, *455
neurotensin-induced
histamine and, 577-582
in pseudohypoparathyroid patients, *491

HYPERGLYCEMIA

acute water intoxication and, 61-63, *508
in community diabetes screening programs, 377-383
in diabetic mice, 970
and erythrocyte deformability, 895-901
fasting
in adult-onset diabetics, and acute insulin responses to glucose, 750
flonidine and, 554-561
gastric inhibitory polypeptide response to
in insulin-dependent, maturity-onset diabetics, *500
in genetically obese mice
and human growth hormone fragments, 883-887
glucagon suppression of, *455
-induced suppression of glucagon release during surgery
in diabetic and normal patients, *492
and insulinopenia in diabetics
glucagon blockade of hepatic glucose storage and, *454
and motor nerve conduction velocity in untreated diabetes, *435
neurotensin-induced
histamine and, 577-582
and obesity in mice
and monoamine oxidase, catechol-O-methyltransferase, and norepinephrine levels, 389-394
and synthetic fragment of human growth hormone, 597-598
and onset of juvenile diabetes, *464
in pancreas-transplanted mice
immunoreactive insulin stores of transplants related to recovery from, *486

SUBJECT INDEX 1978

- and pancreatic polypeptide secretion, *510
- and plasma glucagon response to glucose in treated diabetics, 1145-1150
- polyol pathway activity and diabetic complications and, 108
- postprandial, in diabetics and splanchnic glucose exchange, 121-126
- and renal growth in diabetic rats, *481
- stress-induced counterregulatory hormone interactions in, *504
- during surgery on diabetics and use of artificial beta cell, *431
- and testosterone and age effect on streptozotocin diabetic mice, *492
- and vascular complications of diabetes, 583
- HYPERINSULINISM**
 - diagnosis
 - glycemic response to glucagon and, *475
 - in familial hypertriglyceridemia, 682-692
 - and hyperandrogenism and insulin resistance
 - in polycystic ovarian disease, *469
 - and liver disease, 201-202
 - and obesity
 - in portal blood flow study, 840-848
 - and post receptor defect, *451
 - in rat fetus
 - placental role in, *462
- HYPERKALEMIA**
 - and insulin secretion, 550-553
- HYPERKETONEMIA**
 - maternal and fetal metabolic homeostasis, *488
- HYPERLIPIDEMIA**
 - basal glucagon and, *478
 - inula racemosa therapy trials in, *467, *495
- HYPERPROLACTINEMIA**
 - and familial multiple endocrine neoplasia Type I, *512
- HYPERTENSION**
 - Goldblatt and development of diabetic glomerular lesions in rats, 738-744
 - and plasma aldosterone and renin activity in diabetics, 732-736
- HYPERTHYROIDISM**
 - and glucose intolerance
 - age and, 543-548
 - and hypersecretion of proinsulin, *480
 - and ketonemia in fasting patients, *504
 - methimazole-treated pancreatic polypeptide antibodies in, *466
- HYPERTRIGLYCERIDEMIA**
 - diabetic
 - hepatic triglyceride secretion measurement in, *448
 - familial
 - interactions of obesity and glucose-stimulated insulin secretion in, 682-692
 - in glucose-6-phosphatase deficiency, *506
 - high carbohydrate diets and, 1215-1227
- HYPOALDOSTERONEMIA**
 - and hyperkalemia in diabetics, 732-736
- HYPOCALCEMIA**
 - during diabetic ketosis therapy, *467
 - in infants of diabetic mothers, *464
 - in pseudo- and hypoparathyroid patients, *491
- HYPOGLYCEMIA**
 - acute
 - and ¹⁴C-palmitate removal during ventriculo-cisternal perfusion in dogs, *476
 - and coma and ketoacidosis
 - in nondiabetic alcoholics, *465
 - and diet-induced ketosis, 1087-1091
 - fictitious, 653
 - and fibrosarcoma secretion of nonsuppressible insulin-like protein, *433
 - gastric inhibitory polypeptide response to
 - in insulin-dependent, maturity-onset diabetics, *500
 - and glucagon secretion in nondiabetics and juvenile-onset diabetics, *495
 - glucose intolerance following adrenergic blockade and, *511
- idiopathic reactive
 - reactions to mixed meals and oral glucose tolerance tests in, *481
- in infants of diabetic mothers, *464
- insulin
 - glucose and circulating hormones in counterregulation of, *502
- in insulin-resistant patients with regular insulin or sulfated insulin therapy, 313
- insulinoma and
 - resection and, 774-777
- and intravenous injections of ¹³¹I insulin and ¹³¹I proinsulin in rats, 402
- McN-3495 studies in animals and, 856-867
- maternal
 - and fetal glucose turnover in utero, *463
- in nasal absorption of insulin study in dogs, 297-298
- and non β -cell tumor
 - and increased nonsuppressible insulin-like protein, *498
- and nonsuppressible insulin-like protein secreted by fibrosarcoma, *433
- during oral glucose tolerance tests
 - correlation with blood glucose levels, *484
- C-peptide measurements in, 268-269
- reactive
 - fructose, sucrose and glucose ingestion compared in, *438
- during sleep or fasting, 298
- HYPOINSULINEMIA**
 - and acute water intoxication in mice, 61-63
- HYPOMAGNESEMIA**
 - as risk factor in diabetic retinopathy, 1075-1077
- HYPONATREMIA**
 - and hyperglycemia, 61-63
 - in mice
 - hyperglycemia and, *508
- HYPOPARATHYROID**
 - hyperglucagonemia and, *491
- HYPOPHOSPHATEMIA**
 - and insulin infusion in diabetic ketoacidosis, *500

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

January, 1-70	Supplement 2, 431-522	August, 793-882
February, 71-144	May, 523-610	September, 883-968
Supplement 1, 145-285	June, 611-700	October, 969-1058
March, 287-356	July, 701-792	November, 1059-1144
April, 357-430		December, 1145-1232

SUBJECT INDEX 1978

HYPOPHYSECTOMY
and salivary gland and pancreatic glucagon, *484

HYPOTHALAMUS

rat
2-deoxyglucose uptake by, *452
ventromedial
and mediation of dietary-induced changes in sympathetic activity in mice, *515
ventromedial lesions
and pancreatic somatostatin content, *441

HYPOTHERMIA

and 2-deoxy-D-glucose-induced glucoprivation in humans, *507

HYPOTHYROIDISM

serum triiodothyronine and cholesterol concentrations in, 546-548

HYPOXIA

-induced acceleration of glucose uptake into muscle, *472

I

IBMX

and insulin release and cyclic AMP content of cultured and fresh islets, 769-770

IMMUNE COMPLEXES

circulating
and vascular damage in diabetics, *486

IMMUNE REJECTION

of islet cell transplants, 428-429

IMMUNITY

cell-mediated
in juvenile-onset diabetes, 1118

IMMUNOCYTOCHEMICAL STUDIES

of islets of Langerhans of juvenile-onset diabetes, 251-261

IMMUNOFLUORESCENT TECHNIQUES

in studies of islet cells of spontaneously diabetic mice, 2

IMMUNOGLOBULIN

from sera of insulin resistant diabetics
effects on adipocyte metabolism, 938-944

IMMUNOGLOBULIN A

deficiency in juvenile diabetics, 1092-1096

IMMUNOLOGY

and circulating immune complexes in vascular disease, *486
and HLA typing in juvenile diabetics, *511
IgA deficiency in juvenile diabetics, 1092-1096
immunodeficiency in diabetic mice, *460
immunogenicity studies of insulins in several animal species, 8-14
and impaired granulocyte adherence in poorly controlled diabetes, 677-681
and islet allograft rejection mechanisms, *440
islet-cell antibodies and HLA typing in Pima Indians, *460
and islet cell surface antibody production in rabbits immunized with islet cells, *458
and killer cell activity in insulin-dependent diabetes, *459
and lymphokine eosinophil stimulator promoter secretion in diabetic animals, *484

IMPOTENCE

and autonomic neuropathy, 1043, 1050-1051
in diabetic and nondiabetic arterial occlusive disease, 975-981
differential diagnosis of, 1050-1051

INCRETIN

nutrient-independent
release in rat and human intestine, *488

INDOMETHACIN

and inhibition of prostaglandin synthesis and glucagon secretion, *490
and insulin and glucagon release in dogs, *470
and insulin secretion by cultured perfused rat islets, *457

INFANTS

of diabetic mothers

comparison of prenatal data on, *464
neonatal morbidity amongst, *464
hyperinsulinism diagnosis in glycemic response to glucagon and, *475
premature
amino acids effect on insulin and growth hormone responses in, 334-337

INFECTION

of beta cells by Coxsackie B3 viruses, 778-781
and diabetes control, *436
in diabetic mice
and T-lymphocyte immunoblast proliferation *459
in diabetics
and bactericidal granulocyte function, 889
fungal
and serum antifungal precipitins in diabetics, *466
and impaired granulocyte adherence in poorly controlled diabetes, 677-681
and skin preparation before insulin injection, *485
viral
and diabetes pathogenesis, 1126-1136

INSULIN

absorption studies, *439
action
cyclic IMP as intracellular mediator of, *499
d-propranolol imitation of in cultured lymphocytes, *508
acute responses in man
and basal glucose and tolbutamide, *497
and adipose tissue hexose metabolism, *481
administration routes for, 296
annual production of, 877
antibodies to
assays of, 218
binding effects on free insulin levels in acute diabetic ketoacidosis, 1151-1154
effects on metabolic control in diabetics, hemoglobin A₁ determinations and, *436
equilibrium binding assay and kinetic characterization of, 653-659
in studies of islet cells of spontaneously diabetic mice, 2-6

SUBJECT INDEX 1978

- antibody affinity
 - role in insulin resistance, *496
- antilipolytic effects
 - in obese diabetic Pima Indians, *462
- assays
 - in fetal pancreas islets, 613
 - and C-peptide assays, 217-218
- binding
 - to liver nuclei of obese and lean mice, *477
 - in primary hepatocyte cultures, *509
 - sites on rat fat cell, *450
- binding and degradation in rat kidney, *451
- binding and degrading sites in rat liver plasma membranes, *451
- binding to monocytes
 - exercise and, *449
 - in maturity-onset diabetics, *431
- binding proteins from isolated parenchymal cells from rat liver, *473
- biosynthesis
 - and proinsulin C-peptide, 145-148
- biphasic response, 21-26
- and calcium transport by adipocyte endoplasmic reticulum, *468
- cholesterol balance and, 1059-1064
- clearance by isolated rat kidney, 192-196
- clinical problems in use of, 298
- content and release in fetal rat pancreases transplanted into normal and diabetic rats, *512
- deficiency
 - in cystic fibrosis, and gastric inhibitory polypeptide hypersecretion after oral glucose, *501
 - pathophysiology of, 241-243
- deficiency in rats
 - and intestinal very low density lipoprotein secretion, 902-914
 - intraportal islet transplantation and, 817-823
- degradation
 - effectiveness in anterior pituitary tissue, *515
 - in perfused isolated fat cells, time course study, *482
 - site of cleavage by insulin-protease, *450
- degradation in liver
 - lysosomes and, *450
- and 2-deoxyglucose uptake in rat brain, *252
- dependent childhood diabetes
 - cultured fibroblast studies in, 338-341
- dependent diabetes
 - and artificial beta-cell control, *482
 - complex carbohydrates and plasma glucose in, *443
 - disease susceptibility and HLA complex in, *511
 - glycosylated hemoglobins related to cholesterol and low density lipoprotein cholesterol in, *505
 - growth hormone and glucose in, *513
 - IgA deficiency and, 1092-1096
 - killer cell activity in, *459
 - and residual beta-cell function related to age at onset and diabetes duration, 262-264
- dependent juvenile diabetes
 - classification of control in, *444
- dependent maturity-onset diabetes
 - gastric inhibitory polypeptide response to hyperglycemia and hypoglycemia in, *500
- developmental pattern in fetal and neonatal rat pancreas, *473
- dextran complex
 - and pyruvate dehydrogenase in mouse adipose tissue, *502
- and diabetic ketoacidosis
 - and energy requirements, *508
- dosage
 - and high density lipoprotein cholesterol levels in juvenile-onset diabetics, *447
 - in juvenile diabetics, *485
- effect on capillary endothelial cells, 745-749
- fasting levels
 - in hepatic cirrhosis, *498
- ferritin-
 - electronmicroscopy with, in insulin receptor distribution on surface of human placental syncytial trophoblast study, 530-537
- and fetal pancreatic transplant growth after transplantation in alloxan diabetic rats, *492
- glucose-induced release of
 - calcium and, 365-369
- and glucose metabolism in rat muscle and adipose tissue
 - and high- and low-fat diets, 114-119
- and glucose turnover during glucose infusion in man, *461
- and glycogen synthase phosphatase in fasted rat hearts, *476
- and growth and differentiation of syngeneic transplanted fetal
 - rat pancreas, 988-994
- and hepatic pyruvate metabolism, *491
- hexose uptake and
 - and cell membrane fluidity, *452
- homeostasis, *see* Glucose-insulin homeostasis
- and hypercalciuria in diabetes, *433
- and hypoglycemia
 - glucose and circulating hormones in counterregulation of, *502
- immunogenicity in several animal species of, 8-14
- immunologic resistance to
 - sulfated beef insulin and, 307-317
- immunoreactive
 - in diabetics and fasting nondiabetics, 178-183
 - in duct-ligated pancreatic transplants, recovery from hyperglycemia and glucose intolerance in mice and, *486
 - epinephrine enhancement of potassium-stimulated secretion of, 550-553
 - release from islet cell suspensions in vitro, *474
 - release from pancreatic B cell cultures, 3T3 fibroblasts and, *440
- and impaired granulocyte adherence in poorly controlled diabetes, 678
- infusion
 - in diabetic ketoacidosis therapy, *465
 - and plasma phosphate in insulin-dependent diabetics, *500
- infusion and deprivation
 - and immunoreactive glucagon responses in pancreatectomized patients, 1005-1011
- infusion in diabetic ketoacidosis
 - and effects of insulin antibody binding on free insulin levels, 1151-1154
- inhibition of lipolysis in human adipocytes, role of cyclic AMP in, *469
- injection
 - skin preparation before, *485
- interaction with cell surface receptors
 - pH effects on, *510
- intraperitoneal delivery during dialysis, *439
- levels
 - auditory acuity in diabetics and, *485
 - in diabetic and nondiabetic Chinese hamsters, *514
 - and growth hormone administration

SUBJECT INDEX 1978

- in diabetics, 921, 925
- in viral hepatitis patients, 663-665
- like effects of concanavalin A, *509
- like protein
 - secretion by fibrosarcoma, hypoglycemia secondary to, *433
- like protein, nonsuppressible and non-B-cell tumor hypoglycemia, *498
- low dose
 - in diabetic ketoacidosis management, *480
- metabolism
 - by isolated liver and muscle in uremic nephrectomized rats, *499
 - in liver disease, 201-206
 - mathematical model of, and effects of increased portal blood flow, 840-848
- multiple daily injections
 - diabetic retinopathy and, 592-596
- nasal absorption in dogs, 296-299
- nonhypoglycemic reaction
 - pathophysiology of, *489
- and ornithine decarboxylase in liver and hindlimb muscles of starved and diabetic rats, *501
- portable delivery system
 - and glycemic control in pancreatized dogs, *439
- preparation and characterization of standard materials for natural human proinsulin and C-peptide from, 161-169
- production
 - and recombinant DNA research, 877-878
- and protective effects of ketogenic diets against hypoglycemia, 1087-1091
- in rat brain
 - distribution of, distribution of insulin receptors and, *452
- regional concentration and in-vitro secretion by dog pancreas, 96-101
- regular and NPH
 - time course in diabetics, *439
- release
 - by anomer of D-mannose, *495
 - atropine and, 638-641
 - and cyclic AMP content of rat pancreatic islets, 766-772
 - and glucosamine and N-acetyl-glucosamine, *515
 - and glucose effect on cations in pancreatic islets, *483
- glucose-induced, and barbituric acid against alloxan inhibition of, 71-76
- glucose-induced, calcium and, *456
- from human fetal islets of Langerhans, *477
- and indomethacin, *470
- in-vitro determinations of, 72
- and C-peptide secretion during remission phase of juvenile diabetes, 670-675
- and phosphate metabolism in cultured fetal rat islets, *456
- pyruvate and lactate stimulation of, *483
- time courses after injections into pancreatic artery of dogs of tetragastrin, tolbutamide, xylitol, and glucose, 1189-1195
- vitamin A and, *470
- release from isolated rat islets of Langerhans
 - alloxan stimulation and inhibition of, 1205-1214
 - ethanol and, *505
- release from perfused rat pancreas
 - prostaglandins and, 801-808
 - verapamil and, 997-1001
- releasers
 - epinephrine and inhibition of, 319-326
- requirements
 - of brittle diabetics, determination with artificial pancreas, *437, 825-832
 - and hyperglucagonemia in diabetics, 649-652
- requiring juvenile diabetics
 - hemoglobin A_{1c} determinations in, 103-105
- resistance
 - in acute uremia, site of, 571-575
 - and hyperandrogenism and hyperinsulinemia in polycystic ovarian disease, *469
 - in isolated soleus muscles of genetically obese rats, *453
 - in maturity-onset diabetes, *431
 - obesity and, *465
 - post receptor defects causing, *451
 - role of insulin antibody affinity in, *496
- response
 - and portal vein islet transplantation in diabetic rats, *435
- response to glucose
 - sodium salicylate and, 750-755
- response to glucose loading and clinical heterogeneity of diabetes, 1121-1122
- response to ingested amino acids after jejunoileal bypass surgery for morbid obesity, 78-83
- response to mixed meal in chlorpropamide-treated diabetics, *478
- response in premature infants
 - amino acid infusion and, 334-337
- and reversal of alloxan diabetes in syngeneic transplanted rats, 982-986
- and RNA synthesis by rat hepatocytes, *494
- role in triglyceride metabolism, 682-692
- secretion
 - and alloxan and D-glucose, *456
 - alpha adrenergic inhibition of, reversal by sodium salicylate, *493
 - aspirin and, 1196-1202
 - clonidine and, 554-561
 - during colchicine treatment in rats, 925-929
 - epinephrine and calcium and, *490
 - feedback inhibition by insulin, 563-569
 - fetal, *462
 - gastrointestinal hormones and control of, 782-785
 - in glucose-intolerant Yucatan miniature swine, *497
 - glucose-stimulated, in fetuses, 611-618
 - glucose-stimulated, interactions with obesity in familial hypertriglyceridemia, 682-692
 - indomethacin and, *457
 - inhibition by exogenous insulin in normal subjects, 563-569
 - inhibition by somatostatin and reversal by glucose infusion in dogs, *442
 - and insular amyloidosis, 362-363
 - of islet: transplanted intraportally in diabetic rats, 817-823
 - from isolated, perfused rat pancreas, somatostatin analogs and, *496
 - by isolated rat islets
 - effect of age of animal on, *499
 - pyruvate and, *504
 - late and acute phase, recovery in diet-treated diabetics, *502
 - lithium and, *497
 - in mathematical model of glucose-

SUBJECT INDEX 1978

insulin homeostasis, 1032-1036
in mild diabetes, effect of endogenous gastric inhibitory polypeptide on, 849-854
neural control of, *470
after oral and intravenous glucose, 638
by pancreas monolayer cultures, effects of tissue species and preparative procedures on, *476
in pancreatic vein after enteric glucose loading in dogs, 21-26
C-peptide assays for, 267-271
phosphatidylinositol hydrolysis during first phase of, carbohydrate and ion requirements for, *482
and prostaglandins and thromboxane A₂, *457
by rat pancreas, immediate response to glucose compared with tolbutamide and other secretagogues, 27-33
and residual beta-cell function in diabetics, 226-229
somatostatin and, 300
during spinal anesthesia, *480
by transformed bovine beta cells, *487
-sensitive phosphoprotein of rat adipocyte plasma membranes, *453
sensitivity
 hepatic, effect of uremia and uremic blood on, *494
 in obese mice, *507
 quantitative estimation of, *468
 and starvation, *462
and serum potassium in diabetics, 735
and somatostatin release from isolated rat islets, *507
somatostatin as supplement to, 300
-stimulated glucose transport in muscle from aged obese rats, *472
stimulation of ion transport, 94
sulfated beef
 and immunologic insulin resistance, 307-317
suppositories
 in normal and diabetic dogs, *514
therapy
 circulating C-peptide levels and, 235-240
 and plasma immunoreactive glucagon in juvenile-type and adult-type diabetics, 411-418
-treated diabetics

endocrine function study in, *474
and high carbohydrate, high fiber diets, *443
and hypomagnesia related to diabetic retinopathy, 1075-1077
insulin, C-peptide, and proinsulin in, 178-183
with islet cell antibodies, C-peptide assays for islet function in, 265-266
metabolic response to glycemic control by artificial endocrine pancreas in, *431
pancreatic polypeptide antibodies, *466
plasma glucagon response to oral glucose loading in, 1145-1150
serum lipids and lipoproteins in, 1078-1086
triglyceride patterns in, *444
-treated juvenile diabetics
 skeletal muscle adaptations during physical training of, *471
 and somatomedin deficiency in Mauriac syndrome, *479
and tryptophan metabolism by isolated rat diaphragms, *469
uptake by hepatocytes of rat liver, *451
use by Minnesota schoolchildren, 58

INSULIN RECEPTORS

on adipocytes, 946-958
antibodies
 adipocyte metabolism and, 938-944
 antibodies to
 cross-linking with second antibody, *449
 and pyruvate dehydrogenase in mouse adipose tissue, *502
autoantibodies against
 and human adipocyte metabolism, *483
on central nervous system synaptosome preparations from rat brain, *495
concentration and affinity measures, 218
on cultured human lymphocytes and simulated diabetic ketoacidosis, 539-541
distribution in human placental villi, 530-537
in dog renal cortex
 physical characteristics of, 88-94
hepatic
 glipizide and, *449
on human erythrocytes
 binding studies of, 701-708

in human platelets, *449
interaction with insulin
 pH and, *510
 on monocytes
 from ketosis-prone diabetics, 1098-1103
 in obese diabetics and nondiabetics, 1175-1181
in rat adipocytes
 coupling between glucose transport and, *452
in rat brain
 distribution of insulin and, *452
in rat fat cell insulin binding studies, *450
and release of insulin binding proteins from isolated parenchymal cells of rat liver, *473

¹²⁵I-INSULIN

in absorption kinetics study, *439
binding to adipocytes, 946-958
binding to dog kidney and liver membranes, 89-94
binding to human erythrocytes, 701-708
binding to IM-9-cultured human lymphocytes, ketoacids and, 539-541
binding to monocytes
 in obese, maturity-onset diabetics, 1175-1181
binding to placental villi, 530-537
binding to rat adipocyte plasma membranes
 antibodies against hexose transport system and, *460
binding studies on rat hepatocytes, *450
degradation by incubated canine pancreatic tissue, 98
in immunologic insulin resistance and sulfated insulin studies, 308-317
in insulin radioimmunoassays, 97
invalidation in vivo by tissue dehalogenase, *505
protamine
 absorption in diabetics with and without insulin pads, *485

¹³¹I-INSULIN

disposition in intravenously injected rat
 comparisons with ¹³¹I proinsulin, 400-410
preparation of, 401

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

INSULIN PROTEASE
insulin degradation by, *450

INSULINOMAS
morphologic characteristics related to functional behavior of, *468
C-peptide assays in diagnosis of, 268-269
preoperative localization by arteriography, *509
resection
use of artificial endocrine pancreas during, 774-777
and urine and plasma C-peptide immunoreactivity, 213

INSULINOPENIA
and hyperglycemia in diabetics
and glucagon blockade of hepatic glucose storage, *454

INULA RACEMOSA
as hypolipidemic agent, *467, *495

IRRADIATION
pituitary
and renal disease in diabetics with retinopathy, *489

ISCHEMIA
leg
and impotence in diabetics and nondiabetics, 975-981
of lower extremity
and femorotibial bypasses in diabetics, *448
and sympathetic nerve function, 973

ISLETS OF LANGERHANS
enzymes
and insulin release in fasting, *489
human fetal, *477
insular amyloidosis
in diabetic *Macaca nigra* monkeys, 357-363
intraportal transplantation into diabetic rats
secretory capability studies of, 817-823
in-vitro maintenance and storage, 428
of isolated perfused dog pancreas
and inhibition of somatostatin release by somatostatin analogs in, *443
isolated rat
alloxan stimulation and inhibition of insulin release from, 1205-1214
and amino acid stimulation of glucagon secretion in, 370-376

glucose-stimulated calcium uptake in, 369

of juvenile-onset diabetics
immunocytochemical study of, 251-261

rat
glucose-stimulated lactate production in, *511
isolation and perfusion techniques, 371

selective calcification of hypercalcemia and diabetes and, 620-624

of spontaneously diabetic mice, 1-6
transplantation research, 427-429

ISOELECTRIC FOCUSING
of human erythrocyte hemolysates for hemoglobin A_{1c} assay, 384-388

ISOPROPYL-2 NICOTINOYL-3 INDOLE
and inhibition of prostaglandin synthesis and glucagon secretion, *490

ISOPROTERENOL
effect on adenylate cyclase prepared from rabbit myocardium, 696-697

ISOTRANSPLANTATION
pancreatic islet
effects of age and organ culture of donor islets on diabetes reversal in rats, 625-630

ISOXAZOLYL PYRIDINIUM
and mitochondrial calcium uptake, 762

J

JEJUNOILEAL BYPASS SURGERY
for morbid obesity
loss of insulin response to ingested amino acids after, 78-83

JUVENILE DIABETES
alanine metabolism in, 420-426
antibodies to nucleic acids in, 1105-1110
antiketogenic action of fructose in, 709-713
beta-cell function in
and C-peptide and proinsulin assays, 230-234

control
and hemoglobin A₁ levels, *434
and patient-monitored glucose determinations, *437

developmentally staged curriculum for education and, *444

diagnosis
and glycosylated hemoglobins, *464
and exercise
and hemoglobin A_{1c} and blood lipids, *436

genetic heterogeneity of, 599-604
glomerular filtration rate in, 38

and glycosylated hemoglobin determinations, 931-937

hemoglobin A_{1c} chromatographic determinations in, 103-106

IgA deficiency and, 1092-1096

and influence of glycemic events on hemoglobin levels, *434

insulin-dependent
classification of control in, *444
disease susceptibility and HLA complex in, *511
growth hormone and glucose concentrations in, *513
viability of cultured skin fibroblasts from, 338-341

and insulin dosage, *485

and insulin therapy
effect on plasma immunoreactive glucagon, 411-418

islets of Langerhans immunocytochemical study in, 251-261

latency-aged
psychosocial maladjustment related to control in, *438

newly diagnosed
alterations in triiodothyronine and reverse triiodothyronine concentrations in, *498

physical training in
skeletal muscle adaptations during, *471

platelet and erythrocyte aggregation in, *496

remission phase of
C-peptide secretion during, 670-675
seasonal variation in onset symptoms in, *465

somatostatin effects on plasma growth hormone, glucagon, and glucose in, 300-305

and somatostatin infusion studies, 1017-1018

and viral infections, 778

and vitreous fluorophotometry technique for measuring early

SUBJECT INDEX 1978

blood-retinal barrier breakdown, 85-87

K

KETOACIDOSIS

and hypoglycemic coma
in nondiabetic alcoholics, *465

KETOACIDOSIS, DIABETIC

effects of insulin antibody binding on
free insulin levels in
insulin infusion and, 1151-1154
energy requirements and nature of
fuels oxidized in, *508
and high-dose insulin therapy
and hypophosphatemia, *500
hyperamylasemia in, *510
low-dose insulin infusion therapy in,
*465
management
with low dose insulin, *480
mechanisms of, 16
plasma vasopressin and, *432
role of counterregulatory hormones in,
*504
simulated
in insulin binding to cultured
human lymphocytes, 539-541

KETOACIDS

and insulin binding to IM-9-cultured
human lymphocytes, 539-541

KETOGENESIS

hepatic
hormonal regulation of, *513
hepatic carbohydrate metabolism and
role of glucagon in, *433

KETONE BODIES

in fasting hyperthyroid patients, *504
production
glucagonoma and, 643-647
utilization
and dichloroacetate, 1070

KETONEMIA

in fasting hyperthyroid patients, *504

KETONES

arterial concentrations and hepatic
balances in juvenile diabetics
fructose infusion and, 709-713

KETOSIS

diet-induced
hypoglycemia and, 1087-1091

KETOSIS, DIABETIC

in hamsters
autonomic neuropathy and, *435
and gastrointestinal tract microbiologic and radiologic abnormalities, *475
insulin receptors on monocytes from
diabetics prone to, 1098-1103
plasma carnitine in, *432
therapy
hypocalcemia during, *467

KIDNEY

adrenergic nerve terminal norepinephrine disappearance rates
in diabetic and nondiabetic mice,
971
and alloxan nephrotoxicity study, *484
cortex pyrimidine metabolism
in diabetic rats, *471
damage
and urinary proteins in diabetics,
*490
diabetic glomerulopathy following
unilateral nephrectomy in
streptozotocin diabetic rats,
35-40
diabetic nephropathy
specificity of increased albumin
concentrations in basement
membranes in, *446
disease
and plasma and urine C-peptide
immunoactivity, 212
glomerular antigens in diabetic rats
increased mesangial actomyosin in,
632-641
glomerular basement membrane
of normal and diabetic rats, *471
relationship with skeletal muscle
capillary basement membrane
thickening, *513
in spontaneously diabetic Chinese
hamsters, *446
glomerular lesions in
effects of Goldblatt hypertension on
development of, 738-744
glomeruli
of pancreatic islet transplanted
diabetic rats, 959-963
and glucose excretion
in mathematical model of glucose-
insulin homeostasis, 1031
growth
in alloxan- and streptozotocin-
diabetic rats, *481

increased filtration surface and basement membrane material in
acute diabetes, *432
insulin binding and degradation
studies, *451
lesions in alloxan diabetic rats
prevention by pancreas transplantation, *446
membrane insulin receptors in dogs,
88-94
nephropathy
and hypertension, and aldosterone
responsiveness in diabetics,
732-736
and C-peptide metabolism, 207
proinsulin and insulin disposition in
rats, 403
rat
insulin degrading activity of
homogenates of, 93
insulin, proinsulin, and C-peptide
clearance by, 192-196
syngeneic transplantation of fetal rat
pancreas at subcapsular site
of, 982-986, 988-994
tissue of obese hyperglycemic mice
catecholamine metabolism in, 392-
394
transplantation
and plasma glucagon and serum
creatinine patterns in diabetics
and nondiabetics with, *493
transplantation in diabetics
visual status and, *435
tubular defect in net ketone-body
anion reabsorption
hyperchloremic metabolic acidosis
caused by, 16-20

L

LACTATE

-alanine exchange in healthy subjects,
292
glucose-stimulated production of
in isolated rat islets of Langerhans,
*511
and McN-3495 compared with
biguanides, 869
oxidation
and dichloroacetate, 1069-1070
-stimulated insulin release, *483

LACTATE-ALANINE-GLUCOSE CYCLE, 294

LESIONS

glomerular

SUBJECT INDEX 1978

- in diabetic rats, 35
- effects of Goldblatt hypertension in rats on development of, 738-744
- insular amyloidosis
 - in diabetic *Macaca nigra* monkeys, 357-363
- kidney and eye in alloxan diabetic rats
- prevention by pancreas transplantation, *446
- vascular
 - associated with impotence in diabetic and nondiabetic arterial occlusive disease, 975-981
- ventromedial hypothalamic and pancreatic somatostatin content, *441
- LEUCINE. *See also* Amino acids
 - immediate insulin-secretory response of perfused rat pancreas to, 31
- L-LEUCINE
 - and insulin release from human fetal islets of Langerhans, *477
- LEUKOCYTES
 - chemotaxis
 - in diabetes, 679-680
- LIPIDS
 - metabolism
 - in assessment of diabetic control, 223-224
- LIPOATROPHIC DIABETES
 - immunologic insulin resistance study in, 308-317
- LIPOGENESIS
 - d-propranolol stimulated, *508
- LIPOLYSIS
 - insulin and
 - in obese diabetic Pima Indians, *462
 - insulin inhibition of
 - cyclic AMP and, *469
 - and ketogenic activity of growth hormone in diabetics, 916-923
 - rate
 - effect of adipocyte concentration on, *472
- LIPOPROTEIN-CHOLESTEROL
 - high density
 - in diabetics with peripheral arteriosclerotic disease, *516
 - low density
 - and glycosylated hemoglobins in insulin-dependent diabetics, *505
- LIPOPROTEIN LIPASE
 - of postheparin plasma of insulin-treated diabetics, 1082-1083
 - in rat tissues
 - estrogen and nutritional state and, *507
- LIPOPROTEIN TRIGLYCERIDE
 - plasma very low density
 - rise in late gestation, *464
- LIPOPROTEINS
 - high density
 - in insulin-treated diabetics, 1078-1085
 - in juvenile-onset diabetics, *447
 - very low density
 - and basal glucagon, *478
 - carbohydrate-induced changes in, *513, 1215-1227
 - conversion to low density lipoproteins in adult-onset diabetics, *447
 - intestinal secretion in insulin deficient rats, 902-914
- LITHIUM
 - and stimulus-induced insulin secretion and glucose tolerance, *497
- LIVER
 - carbohydrate metabolism
 - ketogenesis and, role of glucagon in, *433
 - cholecalciferol 25-hydroxylase of vitamin D₃
 - in streptozotocin-diabetic rats, *432
 - cirrhosis
 - proinsulin metabolism in, *498
 - disease
 - C-peptide and insulin metabolism in, 201-206
 - glucose storage blockade during insulinopenia
 - glucagon and, *454
 - glycogen synthesis
 - in mathematical model of glucose-insulin homeostasis, 1030-1031
 - hepatocytes
 - ¹²⁵I-glucagon binding to, *491
 - insulin binding to nuclei isolated from obese and lean mice, *477
 - insulin degradation in lysosomes and, *450
- insulin receptors
 - alteration by glipizide, *449
- insulin sensitivity
 - effects of uremia and uremic blood on, *494
- isolated, from uremic rats
 - insulin metabolism in, *499
- ketogenesis and triglyceride synthesis
 - hormonal regulation of, *513
- ketone synthesis
 - and glucose-6-phosphatase deficiency, *506
- membranes
 - insulin receptor binding by, 1098
- metabolism
 - and chronic hyperglucagonemia, 643-647
 - primary hepatocyte cultures for study of, *509
- mitochondria
 - calcium uptake by, phenethylbiguanide and, 757-764
- ornithine decarboxylase in starved and diabetic rats
 - insulin regulation of, *501
- pancreas islet islet transplantation into reversal of diabetes in rats and, 625-630
- C-peptide metabolism, 197-200
- perfused, of acutely uremic rats
 - insulin resistance studies, 573, 574-575
- phosphorylase kinase
 - purification and characterization of, *474
- plasma membranes
 - ¹²⁵I-glucagon binding by, 589-591
 - insulin binding to, 88-94
- proinsulin and insulin disposition in rats, 403
- pyruvate metabolism
 - glucose, insulin and decanoylcarnitine effects on, *491
- rat
 - isolated parenchymal cells of, release of insulin binding proteins from, *473
- rat, plasma membranes
 - insulin binding and degrading sites in, *451
- rat hepatocytes
 - insulin binding studies on, *450
 - insulin uptake by, *451
- steatosis
 - in familial hypertriglyceridemia with hyperinsulinemia, 682-692
- synthesis and secretion of very low density lipoproteins

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

January, 1-70	Supplement 2, 431-522	August, 793-882
February, 71-144	May, 523-610	September, 883-968
Supplement 1, 145-285	June, 611-700	October, 969-1058

April, 357-430		December, 1145-1232

SUBJECT INDEX 1978

- carbohydrate diet-induced changes in, 1215-1227
- tissues from obese hyperglycemic mice
 - catecholamine metabolism in, 392-394
 - triglyceride secretion
 - measurement in diabetics with hypertriglyceridemia, *448
 - venous ketone concentrations in juvenile diabetics
 - fructose infusion and, 709-713
- LUGOL'S SOLUTION
 - and blockage of thyroidal uptake of radioiodine in insulin studies, 308
- LYMPH NODES
 - of diabetic mice
 - T-lymphocyte immunoblast proliferation in, *459
 - IM-9-cultured human
 - insulin binding to, simulated diabetic ketoacidosis and, 539-541
 - insulin binding to
 - and insulin and beta-hydroxybutyrate, 1098, 1103
- T-LYMPHOCYTES
 - function
 - in diabetic animals, *484
 - immunoblast proliferation in diabetic mice, *459
- LYMPHOKINE EOSINOPHIL STIMULATOR PROMOTER
 - secretion in diabetic animals, *484
- LYSOSOMES
 - and insulin degradation in liver, *450
- M**
- MAGNESIUM
 - and insulin binding to erythrocytes, 703, 707
- MALNUTRITION
 - protein
 - after jejunoileal bypass, 80, 83
- MALONYL-CoA
 - and ketogenesis, *433
- MANNOSE
 - and hemoglobin A_{1c} synthesis by erythrocytes, *433
 - immediate insulin-secretory response of perfused rat pancreas to, 31-32
- D-MANNOSE
 - anomer of
 - insulin release by, *495
 - protection against alloxan inhibition of glucose-induced insulin release by, 71
- MANOMETRY
 - and esophageal motor abnormalities, 1045-1046
- MASS SPECTROSCOPY
 - and glucose tolerance factor analysis, 49-50
- MATHEMATICAL MODELS
 - of glucose disappearance rates
 - quantitative estimation of insulin sensitivity with, *468
 - glucose-insulin homeostasis in man, 1027-1040
- MAURIAC SYNDROME
 - somatomedin deficiency in, *479
- McN-3495
 - comparison with biguanides, 868-875
 - hypoglycemic activity studies in animals, 856-867
- McN-3802
 - pharmacologic profile of, *438
- MENTAL PROBLEMS
 - of latency-aged diabetics
 - diabetic control and, *438
- MESENCHYMAL FACTOR
 - and glucagon and insulin release from human fetal islets of Langerhans, *477
- METABOLISM
 - adipocyte
 - effects of anti-insulin receptor autoantibodies on, 938-944
 - alanine, *461
 - diabetes and, 420-426
 - in healthy subjects, 287-294
 - amino acids
 - glucose and, *461
 - in skeletal muscle tissue culture, *496
 - of blood capillary preparation from eel
 - swim bladder rete mirabile
 - glucose-induced alterations in, 108-112
 - calcium
 - and glucose-induced biphasic insulin release, *456
 - carbohydrate
 - and choline-free diet in rats, *506
 - Venezuelan-encephalitis-induced defect in, in genetically diabetic mice, *477
 - carbohydrate and lipid
 - and high carbohydrate, high fiber diets in insulin-treated diabetic men, *443
 - catecholamines
 - in tissue from obese hyperglycemic mice, 389-394
 - changes in hyperthyroid patients, 546
 - cholesterol
 - in diabetes, *448
 - diabetic control and, 1059-1064
 - and epinephrine effects on glucose turnover and free fatty acid levels, *478
 - fat
 - in ketoacidosis, 16
 - fetal
 - and maternal hyperketonemia, *488
 - fetal glucose
 - and maternal hypoglycemia, *463
 - of glucosamine and N-acetyl glucosamine, *515
 - glucose
 - effect of adipocyte concentration on, *472
 - glucose infusion and, *461
 - mathematical model for, 1027-1040
 - in normal and diabetic subjects, intermittent endogenous hyperglucagonemia on, *455
 - and recycling into glycogen, *461
 - glucose and amino acid, in perfused rat skeletal muscle
 - dichloroacetate and, 1065-1073
 - glucose uptake into muscle
 - and exercise- and hypoxia-induced acceleration of, *472
 - glucose uptake by skeletal muscle
 - starvation and, *462
 - hepatic carbohydrate
 - ketogenesis and, *433
 - hepatic pyruvate, *491
 - hexose by adipose tissue
 - insulin and procaine effects on, *481
 - of human adipocytes
 - effects of anti-insulin receptor autoantibodies on, *483
 - insulin

SUBJECT INDEX 1978

by isolated liver and muscle in
uremic nephrectomized rats,
*499
mathematical model of, and effects
of increased portal blood flow,
840-848
in rat kidney, *451
in rat liver, *451
insulin degradation by insulin-
protease, *450
insulin degradation in liver
lysosomes and, *450
insulin and proinsulin in rats, 400-410
insulin, proinsulin, and C-peptide
by isolated rat kidney, 192-196
and islet cell transplants into diabetic
animals, 428
lipid
in assessment of diabetic control,
223-224
liver
and chronic glucagon excess, 643-
647
C-peptide, 207-209
by liver, 197-200
C-peptide and insulin
in liver disease, 201-206
phosphate
and glucose-initiated efflux of phos-
phate ions in fetal islets, 611-
618
and maturation of insulin release in
cultured fetal rat islets, *456
placental
insulin and, 530
platelet, in diabetics, 346
proinsulin
in hepatic cirrhosis, *498
proinsulin C-peptide and, 145-148
protein
in assessment of diabetic control,
224-225
pyruvate
in isolated rat islets, *504
renal cortex pyrimidine
in diabetic rats, *471
skeletal muscle
during physical training of insulin-
treated juvenile diabetics,
*471
thyroxine
in newly diagnosed juvenile dia-
betes, *498
triglyceride
role of insulin in, 682-692
tryptophan
by isolated rat diaphragms, insulin
and, *469
vitamin D

in diabetes, *432

METABOLITES

patterns in insulin-treated diabetics
and glycemic control by artificial
pancreas, *431
plasma and urine
effects of ketogenic diet on, 1088

METHIMAZOLE

-treated hyperthyroidics
pancreatic polypeptide antibodies
in, *466

3-O-METHYL-D-GLUCOSE

and alloxan stimulation and inhibition
of insulin release from rat is-
lets of Langerhans, 1208-1214
immediate insulin-secretory response
of perfused rat pancreas to, 32
protection against alloxan inhibition of
glucose-induced insulin re-
lease by, 71

[N-(1-METHYL-2-PYRROLIDINYL-
IDENE)-N'-PHENYL-1-
PYRROLIDINECAR-
BOXIMIDAMIDE]. See
McN-3495

METOCLOPRAMIDE

pancreatic polypeptide response to,
*506

MICE

acute water intoxication in
and hyperglycemia, hypoin-
sulinemia, and
hyperglucagonemia, 61-63
adipose tissue
insulin-dextran complex, anti-
insulin receptor antibody and
concanavalin A activation of
pyruvate dehydrogenase in,
*502

diabetic

and defective lymphokine produc-
tion, *484
McN-3495 studies in, 857, 863-864
and T-lymphocyte immunoblast
proliferation, *459
diet-induced changes in sympathetic
activity in
ventromedial hypothalamus media-
tion of, *515
duct-ligated pancreatic transplants in
and relationship of insulin stores in
transplants to recovery from
hyperglycemia and glucose
intolerance, *486

genetically diabetic

arteriolar alterations in, *445
natural and synthetic glucose toler-
ance factor comparisons in,
50-56

Venezuelan encephalitis-induced
carbohydrate metabolism de-
fects in, *477

genetically obese

human growth hormone effects on
fasting blood glucose and glu-
cose tolerance in, 883-887

with hereditary obese-hyperglycemic
syndrome

monoamine oxidase, catechol-O-
methyl-transferase, and
norepinephrine levels in,
389-394

hyponatremia and hyperglycemia in,
*508

ketogenic diets as protection against
hypoglycemia in, 1087-1091

obese

insulin sensitivity in, *507

obese hyperglycemic

inbred with nude thymusaplastic
mice, *503

test of synthetic fragment of human
growth hormone in, 597-598

obese and lean

insulin binding to liver nuclei from,
*477

pancreatic B-cells electrical activity
suppression by mitochondrial inhib-
itors, *466

and tetra-ethyl-ammonium and
potassium permeability, *500

spontaneously diabetic

islet cell changes in, 1-6

sympathetic nerve function studies
in, 969-974

streptozotocin or alloxan diabetic
immunodeficiency in, *460

streptozotocin diabetic

superoxide dismutase and alcohol
effects on, *460

testosterone and age effect on, *492

MICROANEURYSMS

in diabetic retinopathy
multiple daily insulin injections and
increase in number of, 592-
596

MICROANGIOPATHY

in juvenile-onset diabetics
and high-density lipoprotein chole-
sterol, *447

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

SUBJECT INDEX 1978

MICROHEMAGGLUTINATION ASSAYS

and DNA and RNA determinations in juvenile-onset diabetics, 1105-1110

MICROPINOCYTOTIC VESICLES

of capillary endothelium of striated muscle of diabetic rats.
insulin effects on, 745-749

MICROSCOPY

of calcified pancreas islets, 621, 622, 623

of cultured monolayer living A-cells in glucagon release studies, *458

electron

of capillary endothelial cells, insulin and, 746, 747-749

with ferritin-insulin, distribution of insulin receptors on human placental syncytial trophoblasts and, 530, 531-537

of lipoprotein from diabetic rats, 904-905, 906

and morphology of insulinomas related to functional behavior, *468

of endocrine pancreas

comparative morphological studies and, *512

immunofluorescent

of glomeruli of diabetic rats with and without unilateral nephrectomy, 37, 38

light

of Coxsackie B3 virus-infected beta cells, 778-780

of glomeruli of diabetic rats with and without unilateral nephrectomy, 37, 38

of glomeruli of hypertensive diabetic rats, 740-744

of pancreas islets islet transplants in rat livers, 619, 627, 628

of rat kidney stained for antirat AMY, 634

of small intestine of ketotic diabetic Chinese hamster, *435

of transplanted fetal rat pancreas, 989-994

MICROVASCULAR DISEASE

correlation of hemoglobin A₁ levels with, *434

MINNESOTA

diabetes prevalence study in school-age children in, 57-59

MITOCHONDRIAL INHIBITORS

and suppression of electrical activity in mouse pancreatic B-cells, *466

MODELS. See Mathematical models

MONKEYS

Macaca

glucose-intolerant, streptozotocin-treated or pancreatectomized, hemoglobin A_{1c} in, 1182-1187

Macaca nigra

diabetes and atherosclerosis in, *447

insular amyloidosis and diabetes mellitus in, 357-363

MONOAMINE OXIDASE

activity

in peripheral sympathetic nerves of diabetic mice, 970, 971-972

in obese hyperglycemic mice, 389-394

MONOCYTES

insulin binding to exercise and, *449

in maturity-onset diabetics, *431

insulin receptors on

from ketosis-prone diabetics, 1098-1103

from obese diabetic and nondiabetic subjects

insulin binding to, 1175-1181

MORPHOMETRY

of capillary endothelial cells, insulin effects on, 746, 747-749

MORTALITY

and gastric bypass surgery in morbidly obese diabetics and nondiabetics, *498

and insulin treatment of diabetics, 1078

MOUSE CONVULSION METHOD

and measurement of serum insulin-binding antibodies, 307

MUCOCUTANEOUS CANDIDIASIS, CHRONIC

IgA deficiency in, 1096

MUMPS

and diabetes development, 1126-1128

MUSCLE

from aged obese rat

primary inhibition of insulin-stimulated glucose transport in, *472

capillary basement membrane thickening

relationship with glomerular basement membrane thickening, *513

capillary endothelium of diabetic rats insulin effects on, 745-749

cells, arterial

effects of glucose and sorbitol on proliferation of, 583-587

glucose uptake into

work- and hypoxia-induced acceleration of, *472

in-vitro and in-vivo responsiveness to insulin in high- and low-fat diet fed rats, 114-119

isolated, from uremic rats

insulin metabolism in, *499

ornithine decarboxylase in starved and diabetic rats

insulin regulation of, *501

perfused, of acutely uremic rats

insulin resistance studies on, 573-575

proinsulin and insulin disposition in rats, 403-404

rat skeletal

dichloroacetate effect on glucose and amino acid metabolism in, 1065-1073

skeletal

abnormal glucose utilization by, proximity to burn wound and, *508

amino acid metabolism and alanine production in tissue cultures of, *496

bradykinin-induced acceleration of glucose uptake into, prostaglandins and, *512

glucose uptake by, starvation and, *462

morphometric studies of capillaries and pericytes, *445

soleus, of genetically obese rats

intracellular defects and insulin resistance in, *453

MYOCARDIUM

effect of sulfonyleureas on, 694-698

MYOINOSITOL

and motor nerve conduction velocity in neuropathic diabetics, *436

and neuropathy in ketotic diabetic Chinese hamster, *435
and sympathetic nerve function in diabetic mice, 969-974
and insulin secretion, *470
motor nerve conduction velocity
in neuropathic diabetics, low and high dietary myoinositol and, *436

in untreated diabetics, *435
parasympathetic
and carbohydrate metabolism, *506
sympathetic
and fasted pregnant rats, *486
functional dissection in normal and diabetic subjects, *487
ventromedial hypothalamus mediation of diet-induced changes in activity of, *515

NEUROPATHY, DIABETIC
autonomic, 1043-1051
clinical manifestations of, 1045-1051
distribution of, 1044-1045
metabolic and pathologic basis of, 1043-1044
and norepinephrine content of heart and blood vessels, 973
and small intestine and abdominal sympathetic trunk of ketotic diabetic Chinese hamster, *435
and motor nerve conduction velocity low and high dietary myoinositol and, *436

NEUROTENSIN
hyperglycemic and hyperglucagonemic effects of
histamine and, 577-582

NEUROTOXINS
and pancreatic islets metabolic and secretory responses, *457

NORADRENALINE
and gastric glucagon release, *487

NOREPINEPHRINE
in obese hyperglycemic mice, 389-394
in organs of diabetic mice
sympathetic nerve function and, 969-974
pancreatic islet concentrations of, *516

NUCLEIC ACIDS. See DNA; RNA

NUTRITION. See also Diet
and estrogen effects on tissue lipoprotein lipase in rats, *507
fed, fasted and starved rats
tissue and serum somatostatin-like immunoreactivity in, *497
food intake
behavior and, *469
and incretin release in isolated perfused rat intestine and man, *488

mixed meal
glucose, insulin and glucagon response in chlorpropamide-treated diabetics, *478
and idiopathic reactive hypoglycemia, *481
modest meal ingestion in maturity-onset diabetics
gastric inhibitory polypeptide response to, *472
protein-fed rats
glucagon secretion in, *475

O

OBESITY
in aged rats
and primary inhibition of insulin-stimulated glucose transport in muscle from, *472
and between-load differences in oral glucose tolerance tests, 45
and diabetes
and antilipolytic effects of insulin, *462
in diabetic mice, 970
and glucose accumulation in adipose cells of obese rats, *462
and hyperglycemia in mice
and monoamine oxidase, catechol-O-methyltransferase, and norepinephrine levels, 389-394
hyperinsulinemia, portal blood flow and
mathematical model of insulin metabolism and, 840-848
and immunoreactive gastric inhibitory polypeptide secretion, 850-852
and insulin binding to liver nuclei, *477
and insulin binding to monocytes in diabetics and nondiabetics, 1175-1181
interactions with glucose-stimulated insulin secretion
in familial hypertriglyceridemia, 682-692
jejunoileal bypass surgery for
insulin response to oral amino acid ingestion and, 78-83
and maturity-onset diabetes
and somatostatin infusion effects on plasma free fatty acids, glucagon, insulin, glucose and growth hormone, 1015-1016

SUBJECT INDEX 1978

P

- in mice
 - in insulin sensitivity, *507
- in Micronesian population
 - and bimodality of glucose tolerance distributions, 793, 797-798
- morbid, in diabetics
 - and gastric bypass, *498
- and oral glucose tolerance tests and insulin resistance, *465
- and rat muscle and adipose tissue response to insulin, 114-119
- in rats
 - and intracellular defects and insulin resistance in isolated soleus muscles of, *453
- in spontaneously diabetic mice, 1
- OBITUARIES
 - Allan, Frank N., 135-136
- ORAL HYPOGLYCEMIC AGENTS
 - enhancement of mitochondrial Ca²⁺ uptake rate by, 757-764
 - islet stimulation by
 - stress and, 326
 - McN-3495, 856-867
 - compared with biguanides, 868-875
 - methyl 2-tetradecylglycidate
 - pharmacologic profile of, *438
 - therapy
 - prediction of failure by presence of serum islet cell antibodies, *483
 - use by Minnesota schoolchildren, 58
- ORNITHINE DECARBOXYLASE
 - in starvation and diabetes in rats
 - insulin and regulation of, *501
- ³²P-ORTHOPHOSPHATE
 - in studies of glucose-initiated efflux of phosphate ions in fetal pancreas islets, 611-618
- OVARIES
 - polycystic ovarian disease
 - correlation of hyperandrogenism with hyperinsulinemia and insulin resistance in, *469
- OXYGEN
 - hepatic consumption of
 - fructose infusion and, 712
 - uptake by incubated capillary tissue
 - glucose and, 110
- OXYGEN RATE METHOD
 - of glucose analysis, 810-816

- ¹⁴C-PALMITATE
 - removal during ventriculo-cisternal perfusion in dogs
 - effect of acute hypoglycemia on, *476
- PANCREAS
 - A-cell function
 - and insulin therapy, 411-418
 - A-cells
 - and glucagon release, *458
 - A₂-cell glucagon release
 - role of calcium in, 996-1003
 - alpha cell function
 - in pseudohypoparathyroid and hypoparathyroid patients, *491
 - artery, injection of insulinotropic substances into
 - early time courses of insulin release following, 1189-1195
 - artificial, *see* Artificial pancreas
 - beta-cell cultures
 - Coxsackie B3 virus infection, 778-781
 - beta cell function
 - and islet cell antibodies, *458
 - in juvenile diabetics, 230-234
 - C-peptide assays for, in diabetics with persistent islet cell antibodies, 265-266
 - C-peptide immunoassays and, 226-229
 - and C-peptide secretion during remission phase of juvenile diabetes, 670-675
 - beta cell function in vitro
 - and 3T3 fibroblasts, *440
 - beta cell reserve and insulin antibodies in diabetics
 - hemoglobin A₁ levels and assessment of effect on metabolic control of, *436
 - beta-cell secretion
 - assessment by C-peptide assays, 235-240, 241-246
 - beta cells
 - potassium permeability of, *457
 - and size of loading dose in oral glucose tolerance tests in subjects with slightly impaired glucose tolerance, 42
 - transformed, and insulin secretion defects, *487
 - beta cells, mouse
 - electrical activity and tetra-ethylammonium and potassium

- permeability in, *500
- chick embryo
 - differentiation of, *478
- colchicine and, 925-929
- cultured rat islets
 - glucose-induced insulin release and calcium study in, *456
- D-cell function
 - and plasma somatostatin-like immunoreactivity in alloxan diabetic dogs, *442
- delayed response to glucose, 1039
- dog
 - regional concentration and in-vitro secretion of pancreatic polypeptide, insulin and glucagon by, 96-101
- duct-ligated transplants in mice
 - immunoreactive insulin stores in, recovery from hyperglycemia and glucose intolerance related to, *486
- endocrine
 - biochemical and histologic examination in rats fed different levels of protein and carbohydrate, *473
 - comparative morphology of, *512
- fetal islets
 - glucose-initiated efflux of phosphate ions in, 611-618
 - phosphate metabolism and glucose-initiated efflux of phosphate ions in, 611-618
- fetal and neonatal rat
 - developmental pattern of somatostatin, glucagon and insulin in, *473
- fetal rat
 - syngeneic transplantation of, and effect of insulin treatment on growth and differentiation of implants, 988-994
 - syngeneic transplantation of, and effect of insulin treatment on reversal of alloxan diabetes, 982-986
 - transplantation into normal and diabetic rats, insulin content and release of, *512
- fetal rat islet cells
 - differentiation in vitro, *500
- fetal rat islet cultures
 - phosphate metabolism and maturation of insulin release in, *456
- glucagon
 - and hypophysectomy, *484
- hormones
 - and somatostatin infusion in nor-

SUBJECT INDEX 1978

- mals, *442
- insular amyloidosis
 - in diabetic *Macaca nigra* monkeys, 357-363
- insulin
 - and carbohydrate restriction in streptozotocin diabetic rats, *504
- insulin secretion
 - in mathematical model of glucose-insulin homeostasis, 1032-1036
- intraportal islet transplantation in diabetic rats, 817-823
 - and fluorescein accumulation in eye, *435
- islet allograft rejection mechanisms, *440
- islet-cell adenoma resection
 - use of artificial endocrine pancreas during, 774-777
- islet-cell antibodies
 - and HLA typing in Pima Indians, *460
 - and prediction of oral hypoglycemic agent failure in diabetics, *483
- islet cell isolation from, 427-428
- islet cell plasma membranes
 - calcium binding in, *494
- islet cell suspensions
 - immunoreactive glucagon and insulin release from, *474
- islet cell transplantation,
 - future research needs, 427-429
 - and islet preservation methods, *440
 - in streptozotocin diabetic rats, urinary albumin secretion and, *506
- islet cells
 - functional alteration after jejunal or ileal resection in dogs, 1156-1165
 - of spontaneously diabetic mice, 1-6
- islet is transplantation in rats
 - effects of age and organ culture of donor islets on reversal of diabetes, 625-630
- islet transplantation in diabetic rats
 - urinary albumin excretion and, 959-963
- islets
 - calcium efflux, *490
 - fetal human, *477
 - glucose effects upon cations and insulin release by, *483
 - GSH:GSSG and NADPH:NADP ratios, glucose and, *466
 - intraperitoneal is transplanted, long-term functional integrity of, *510
 - in juvenile-onset diabetics, immunocytochemical study of, 251-261
 - metabolic and secretory responses, neurotoxins and, *457
 - norepinephrine and dopamine concentrations, *516
 - organ culture techniques for, 626
 - perfusion procedures, 612
 - preproinsulin, *455
 - isogeneic portal vein transplantation effects on recipient and transplanted islets, *440
 - isolated dog islets
 - and inhibition of somatostatin release by somatostatin analogs, *443
 - isolated perfused rat
 - effects of prostaglandins on glucagon and insulin release from, 801-808
 - isolated rat islets
 - alloxan stimulation and inhibition of insulin release from, 1205-1214
 - barbituric-acid protection against alloxan inhibition of glucose-induced insulin release by, 71-76
 - carbohydrate and ion requirements for phosphatidylinositol hydrolysis during first phase insulin secretion from, *482
 - effect of age of animal on insulin secretion by, *499
 - ethanol effects on insulin release from, *505
 - glucose-stimulated calcium uptake in, 365-369
 - insulin and somatostatin release from, *507
 - and pyruvate and lactate stimulation of proinsulin biosynthesis and insulin release, *483
 - pyruvate metabolism and insulinotropic action in, *504
 - zinc uptake in, *490
 - lymphocytic infiltrates
 - diabetes mortality and, 1092
 - monolayer cultures from hamster and rats
 - effects of preparative procedures on secretion by, *476
 - mouse beta cells electrical activity
 - mitochondrial inhibitors and suppression of, *466
 - neonatal rat islet cultures
 - repetitive responsiveness over time of, *509
 - perfused rat
 - and insulin and glucagon secretion and somatostatin analogs, *496
 - and verapamil inhibition of calcium transport and glucagon release study, 996-1003
 - perifused rat islets
 - alloxan and D-glucose and insulin secretion study in, *456
 - indomethacin and insulin secretion study in, *457
 - polypeptide
 - exercise-induced rise in, adrenergic receptor blockade and, *468
 - regional concentration, distribution and localization in human and canine pancreas, *479
 - regional concentration and in-vitro secretion by dog pancreas, 96-101
 - response to metoclopramide, *506
 - polypeptide antibodies
 - in insulin-treated diabetics and methimazole-treated hyperthyroids, *466
 - polypeptide secretion
 - hyperglycemia and inhibition of, *510
 - rat
 - insulin secretion in response to glucose, tolbutamide and other secretagogues, 27-33
 - rat islets
 - cyclic AMP content related to insulin release by, 766-772
 - rat perifused islets
 - vitamin A inhibition of insulin release in, *470
 - residual beta-cell function
 - in insulin-dependent diabetics, age at onset and diabetes duration related to, 262-264
 - somatostatin content
 - ventromedial hypothalamic lesions and, *441
 - somatostatin and glucagon release
 - alpha-adrenergic agonism and, *502
 - tissue from obese hyperglycemic mice
 - catecholamine metabolism in, 392-394
 - transplantation in alloxan diabetic rats
 - and prevention of kidney and eye lesions, *446
 - transplantation in rats
 - and nutritional and biochemical studies, *493

SUBJECT INDEX 1978

PANCREATECTOMY

- in dogs
 - and portable insulin delivery system, *439
- hyperaminoacidemia after glucagon replacement and, *454
- and immunoreactive glucagon responses to oral glucose, insulin infusion and deprivation, and somatostatin, 1005-1011
- in Macaca monkeys
 - and hemoglobin A_{1c} assays, 1182-1187

PARAPLEGIA

- clonidine effects on glucose homeostasis in subjects with, 555-561

PENICILLAMINE

- induced IgA deficiency, 1095

PENILE ERECTION. *See* Impotence

PENTOSE PHOSPHATE SHUNT

- and glucose, *466

C-PEPTIDE

- antisera
 - characterization of, 170-177
- assays
 - clinical diagnostic uses for, 267-271
 - and endogenous insulin secretion in presence of exogenous insulin in normal subjects, 563-569
 - and endogenously secreted insulin assays, 217-218
 - and evaluation of residual beta-cell function, 262-264, 265-266
 - in juvenile diabetics, 230-234
 - and assessment of diabetic control, *436
- circulating human
 - heterogeneity of, 184-191
- clearance by rat kidney, 192-196
- human
 - metabolism, 207-209
- in hyperthyroidism, *450
- immunoassays
 - C-peptide immunoreactivity in, 170-177
 - and residual beta-cell function, 226-229
 - in urine, 210-215
- levels
 - in insulin-treated diabetics, 235-240, 241-246
- liver metabolism of, 197-200
- in liver disease, 201-206

natural human

- preparation and characterization from crystalline human insulin, 161-169
- in nondiabetics and insulin-treated diabetics, 178-183
- secretion
 - during remission phase of juvenile diabetes, 670-675
- synthesis
 - proinsulin synthesis and, 149-160
- synthetic
 - and radioimmunoassays for C-peptides, 149-160

PEPTIDES

- from human growth hormone
 - diabetogenic activity in obese mice, 883-887
- synthetic
 - hyperglycemic properties of, 597-598

PERCHLORIC ACID

- in pancreatic islet perfusions, 612-613

PERICYTES

- in skeletal muscle of diabetics
- morphometric studies of, *445

pH

- and insulin binding to erythrocytes, 704
- and insulin interaction with cell surface receptors, *510
- of insulin preparations
 - nasal absorption in dogs and, 297-298
- and phenethylbiguanide effect on liver mitochondrial calcium uptake, 759
- and simulated diabetic ketoacidosis during insulin binding to cultured human lymphocytes, 540

PHENETHYLBIGUANIDE

- and mitochondrial calcium uptake rates, 757-764

PHENFORMIN

- and glucose tolerance tests in dogs
- comparison with McN-3495, 870

PHENTOLAMINE

- and adrenergic blockade of exercise-induced pancreatic polypeptide secretion, *468

PHENYTOIN

- induced IgA deficiency, 1095

PHONOCARDIOGRAMS

- in diabetics, 128-133

PHOSPHATE

- metabolism
 - and glucose-initiated efflux of phosphate ions in fetal islets, 611-618
- metabolism in cultured fetal rat islets
- maturation of insulin release and, *456

PHOSPHATE FLUSH

- and glucose-initiated efflux of phosphate ions in fetal islets, 611-618

PHOSPHODIESTERASE

- chlorpropamide inhibition of, *487
- in diabetics, *505

PHOSPHOPROTEINS

- insulin-sensitive
 - of rat adipocyte plasma membranes, *453

PHOSPHORYLASE KINASE

- hepatic
 - purification and characterization of, *474

PICS

- hepatic extraction ratio of insulin and C-peptide in, 197-200

PIMA INDIANS

- bimodal distribution of glycosylated hemoglobin in, *434
- bimodality of glucose tolerance distributions in, 793
- diabetic
 - islet-cell antibodies and HLA typing in, *460
- diabetic control and cholesterol metabolism in, 1063
- diabetic and obese
 - antipolytic effects of insulin in, *462

PITUITARY GLAND

- alpha particle irradiation
 - and renal disease in diabetics with retinopathy, *489
- anterior
 - insulin degradation and effectiveness in, *515

November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

- tumors in multiple endocrine neoplasia type I
hyperprolactinemia and, *512
- PLACENTA**
insulin binding to, 1098
role in rat fetal hyperinsulinism, *462
syncytial trophoblast
distribution of insulin receptors on surface of, 530-537
- PLASMA**
alanine
role in gluconeogenesis, *461
aldosterone and renin activity in diabetics, 732-736
carnitine
in diabetic ketosis, *432
cholesterol
diabetes and, 1059-1064
epinephrine and norepinephrine
effect of stress in islet transplanted diabetic rats on, 819
free fatty acids, glucagon, insulin, glucose, and growth hormone
and somatostatin infusion in maturity-onset diabetes, 1013-1018
free insulin, glucagon and cortisol
and growth hormone administration in diabetics, 921, 925
glucagon
bioassay, *476
in kidney-transplanted diabetics and nondiabetics, *493
response to oral glucose in treated diabetics, 1145-1150
and somatostatin infusion in normals, *442
glucose
and acute insulin responses to non-glucose stimuli, *497
estimation from urine glucose output in calibrated diabetic patients, *437
fasting, and glycosylated hemoglobin in normal subjects and diabetics, 834-838
and fructose, sucrose and glucose ingestion by reactive hypoglycemics, *438
during glucose infusion, *461
and infection in diabetics, *436
in Micronesian population study, 793-799
glucose, epinephrine, norepinephrine and cortisol responses to insulin in diabetics, *489
glucose and immunoreactive insulin
after oral glucose loading in patients with and without coronary artery disease, *477
glucose, immunoreactive insulin, and immunoreactive glucagon
in pseudo- and hypoparathyroid patients, *491
glucose and insulin
fasting, in islet transplanted diabetic rats, effect of stress on, 818-819
growth hormone, glucagon, and glucose
after somatostatin infusion in normal subjects and juvenile diabetics, 300-305
immunoreactive glucagon
and insulin therapy in juvenile-type and adult-onset type diabetes, 411-418
immunoreactive insulin
in nasal absorption of insulin study in dogs, 296, 298-299
in normal and diabetic subjects, triglyceride or galactose ingestion and, 327-333
immunoreactive insulin responses to meals
in diabetics, *503
insulin
pancreatic venous, in glucose-loaded dogs, 21-26
and size of loading dose in oral glucose tolerance tests in subjects with slightly impaired glucose tolerance, 42-48
insulin, glucagon and glucose
clonidine and, 555-556
insulin and glucose
and variations in source and amount of dietary carbohydrate in normal subjects, 1020-1025
ketone bodies
and growth hormone administration in diabetics, 916-923
lactate and alanine
and dichloroacetate, *494
leucine, glycine and serum insulin in obese patients
amino acid ingestion and, 79
levels, and growth hormone in insulin-dependent diabetics, *480
lipids
and diabetic control, 1061
myo-inositol
and motor nerve conduction velocities in neuropathic diabetics, *436
pancreatic glucagon, immunoreactive insulin, and growth hormone in normal and diabetic subjects
L-dopa and glucose and, 396-399
pancreatic polypeptide
exercise-induced rise in, adrenergic receptor blockade and, *468
C-peptide immunoreactivity in normal subjects, 170-177
phosphate
and insulin infusion in insulin-dependent diabetics, *500
and platelet function in diabetics, 345
proinsulin and insulin clearance in rats, 404-406
prolactin and testosterone
in asymptomatic diabetic men with and without organic sexual dysfunction, *515
renin activity and aldosterone
and angiotensin-converting enzyme activity in diabetics, *471
sodium
and acute water intoxication, 61-63
somatostatin-like immunoreactivity and D-cell function in alloxan-diabetic dogs, *442
radioimmunoassay of, *441
triglycerides
and glucose-6-phosphatase deficiency, *506
vasopressin
in uncontrolled diabetes, *432
very low density lipoprotein production
in diabetes, *447
very low density lipoprotein triglyceride
in late pregnancy, *464
very low density lipoproteins
in high-carbohydrate diet fed rats, 1216-1227
- PLATELET FACTORS**
and blood platelet aggregation and adhesion in diabetics, 342-347
- PLATELETS**
aggregation
in juvenile diabetics, *496
insulin receptors in, *449
isolated from normal and diabetic subjects
prostaglandin E production by, *501
- PLETHYSMOGRAPHY**
and forearm hemodynamics and re-

SUBJECT INDEX 1978

- sponses to exercise in middle-aged adult-onset diabetics, 726-731
- POLYCYSTIC OVARIAN DISEASE**
hyperandrogenism, hyperinsulinemia and insulin resistance correlations in, *469
- POLYMORPHONUCLEAR NEUTROPHIL LEUKOCYTES**
adherence in poorly controlled diabetes, 678, 680-681
bactericidal function in diabetes, 889-894
- POLYOL PATHWAY**
activity
hyperglycemia and diabetic complications and, 108
and aldose reductase in rat, *463
in blood capillaries
and glucose-induced metabolic alterations, 108-112
- POLYPEPTIDES**
pancreatic
antibodies to, in insulin-treated diabetics and methimazole-treated hyperthyroidics, *466
antibodies to, in studies of islet cells of spontaneously diabetic mice, 2-6
exercise-induced rise in, *468
hyperglycemia and inhibition of, *510
regional concentration, distribution and localization in human and canine pancreas, *479
response to metoclopramide, *506
- PORTAL VEIN**
blood flow
and fasting peripheral insulin levels, 840-848
isogeneic pancreatic islet transplantation through
effects on recipient and transplanted islets, *440
and fluorescein accumulation in eye, *435
- POTASSIUM**
and beta-cell permeability, *457, *466
and tetra-ethyl-ammonium, *500
and insulin binding to erythrocytes, 703, 707
-stimulated immunoreactive insulin, secretion
epinephrine enhancement of, 550-553
- PRECIPITINS**
antifungal
in diabetic serum, *466
- PREDIABETES**
and replicative capacity of cultured skin fibroblasts, *459
- PREGNANCY**
"accelerated starvation" during fasting in, *463
late
plasma very low density lipoprotein triglyceride rise in, *464
maternal fasting in
and humorally mediated fetal adaptation to, *503
in rats
and fasting, and adrenal medulla and sympathetic nerves, *486
- PREGNANCY, DIABETIC**
maternal hypoglycemia in
and fetal glucose turnover, *463
and neonatal morbidity of infants, *464
outcome
and comparison of prenatal data, *464
- PREMATURITY**
and insulin and growth hormone response to glucose
phenol acid infusion and, 334-337
- PROINSULIN**
genes of rat
cloning in bacterial plasmids, *455
in pancreatic islets and insulin-producing tumors, *455
- PRINCE EDWARD ISLAND**
diabetes control program, *514
- PROCAINE**
and adipose tissue hexose metabolism, *481
and mitochondrial calcium uptake, 762
- PROINSULIN**
assays
in juvenile diabetics, 230-234
biosynthesis
pyruvate and lactate stimulation of, *483
characterization in insulin-treated diabetics, 178-183
clearance by isolated rat kidney, 192-196
fish
mRNA purification and synthesis of complementary DNA, *456
hypersecretion in hyperthyroid patients, *480
metabolism
in hepatic cirrhosis, *498
natural human
preparation and characterization from crystalline human insulin, 161-169
and C-peptide immunoreactivity, 170-177
synthesis
and C-peptide synthesis, 149-160
- PROINSULIN C-PEPTIDE**
insulin biosynthesis and, 145-148
- ¹³¹I PROINSULIN**
disposition in intravenously injected rat
compared with ¹³¹I insulin, 400-410
preparation of, 401
- PROPRANOLOL**
and adrenergic blockade of exercise-induced pancreatic polypeptide secretion, *468
blockade of beta-adrenergic receptors and epinephrine enhancement of potassium-stimulated immunoreactive insulin secretion, 550-553
- d-PROPRANOLOL**
imitation of insulin action in cultured hepatocytes, *508
- PROSTAGLANDIN E**
production
by isolated platelets from normal and diabetic humans, *501
- PROSTAGLANDIN E₁**
-like material
increased production in diabetics, decreased platelet vitamin C levels and, *447
- PROSTAGLANDIN E₂**
and inhibition of acute insulin responses to glucose, 750
- PROSTAGLANDINS**
and bradykinin-induced acceleration

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

of glucose uptake into skeletal muscle, *512
and gastric glucagon release, *487
and insulin secretion, *457
and indomethacin, *470
and platelet aggregation, 346
stimulatory effects on glucagon and insulin release from rat pancreas in vitro, 801-808
synthesis
and glucagon secretion, inhibitors of, *490
by guinea pig islets of Langerhans, inhibitors of, *490

PROTEIN
activator, for phosphodiesterase, *487
circulating alanine exchange with, 287
dietary
and amino acid stimulation of glucagon secretion in rat islets, 370-376
and endocrine pancreatic development and protection against alloxan in rats, *473
glucose and, *461
in rats, glucagon secretion and, *475
insulin-binding
from isolated parenchymal cells from rat liver, *473
malnutrition
after jejunoileal bypass, 80, 83
metabolism
in assessment of diabetic control, 224-225
non-suppressible insulin-like and non B-cell tumor hypoglycemia, *498
phosphorylation
and insulin release in fasting, *489
synthesis
serum albumin and, 292
urinary
in diabetics, *490

PROTEIN ACTIVATOR
decreased in streptozotocin-diabetic rat adipose tissue, *505

PROTEINURIA
in diabetic rats
pancreatic islet transplantation and, 959-963
in diabetics, *490

PSEUDOHYPOPARATHYROID
hyperglucagonemia in, *491

PYRIMIDINE
renal cortex metabolism of
in diabetic rats, *471

PYRUVATE
hepatic metabolism
effect of glucose, insulin and decanoylcarnitine on, *491
metabolism and insulinotropic action in isolated rat islets, *504
-stimulated proinsulin biosynthesis and insulin release, *483

PYRUVATE DEHYDROGENASE
activation in mouse adipose tissue by insulin-dextran complex, anti-insulin receptor antibody and concanavalin A, *502
in starvation
and glucose metabolism, *462

R

RABBIT
atria
effect of sulfonylureas on, 694-698
islet cell antibody production after immunization with islet cells, *458
lipid-lowering effects of inula racemosa in, *495

RACE
and bimodality and unimodality of glucose tolerance distributions, 793-799
in diabetes prevalence study of Minnesota school-age children, 58
and HLA typing in diabetics, *458
of patients in insulin resistance and sulfated insulin studies, 312

RADIOACTIVITY
TCA-precipitable and TCA-soluble in disposition of ¹³¹I-proinsulin and ¹³¹I-insulin studies in rats, 401-406

RADIOAUTOGRAPHY
¹²⁵I-insulin uptake by rat liver hepatocytes study, *451

RAT
adipocyte plasma membranes
insulin-sensitive phosphoprotein of, *453
¹²⁵I-insulin binding to, antibodies against hexose transport system and, *460

adipocytes
insulin receptors and glucose transport in, *452
adipose cell plasma membranes
D-glucose sensitive cytochalasin B binding site in, *453
aged, obese
glucose accumulation in adipose cells of, *462
primary inhibition of insulin-stimulated glucose transport in muscle from, *472
aldose reductase
immunohistochemical localization of, *463
alloxan diabetic
erythrocyte deformability in, 897-898
and fetal pancreatic transplant growth and insulin, *492
pancreas transplantation and prevention of kidney and eye lesions in, *446
alloxan nephrotoxicity study in, *484
alloxan and streptozotocin diabetic renal growth in, *481
atria
effect of sulfonylureas on, 694-698
brain
2-deoxyglucose uptake, insulin and, *452
insulin receptors and insulin distribution in, *452
brain synaptosomes preparations
insulin receptors on, *495
and carbohydrate diet-induced changes in very low density lipoprotein composition and structure, 1215-1227
carbohydrate metabolism
choline deprivation and, *506
colchicine treatment in
glucose-induced insulin secretion and glucose tolerance during, 925-929
cultured hepatocytes
d-propranolol action in, *508
cultured islets
glucose-induced insulin release and calcium study in, *456
diabetic
pancreatic transplantation and nutritional and biochemical studies in, *493
diabetic complications in
effect of islet cell transplants on, 428
diabetic and nondiabetic
and McN-3495 studies, 858-859
diaphragms

SUBJECT INDEX 1978

- tryptophan metabolism and insulin in, *469
- dietary manipulation in
 - and biochemical and histologic examination of endocrine pancreas, *473
- differential localization of glucagon- and gastric inhibitory polypeptide-containing cells of intestine and pancreas in, *441
- epididymal fat cells
 - insulin degradation studies in, *482
- estrogen effects on tissue lipoprotein lipase in
 - nutritional state and, *507
- fat cells
 - insulin binding site studies, *450
- fed, fasted and starved
 - tissue and serum somatostatin-like immunoreactivity in, *497
- fetal hyperinsulinism
 - placental role in, *462
- fetal islet cells
 - differentiation in vitro, *500
- fetal islets
 - phosphate metabolism and maturation of insulin release in, *456
- fetal and neonatal pancreas
 - developmental pattern of somatostatin, glucagon and insulin in, *473
- genetically obese
 - intracellular defects and insulin resistance in isolated soleus muscles of, *453
- glucagon binding by liver membranes in
 - age and, 589-591
- glucose-initiated efflux of phosphate ions in fetal islets of, 611-618
- glucose response to arginine infusion and somatostatin and glucagon-specific analog, *489
- heart
 - glycogen synthase phosphatase activation in, *476
- hepatocyte cultures
 - insulin-binding, glutathione-insulin transhydrogenase, tyrosine aminotransferase and gluconeogenesis in, *509
- hepatocytes
 - ¹²⁵I-glucagon binding to, *491
 - RNA synthesis by, insulin and, *494
- high- and low-fat diet fed
 - muscle and adipose tissue responsiveness to insulin in, 114-119
- high-protein-fed
 - amino acid stimulation of glucagon secretion by perfused islets of, 370-376
- and hypophysectomy
 - and salivary gland and pancreatic glucagon levels, *484
- intestine
 - nutrient-independent incretin release, *488
- intravenously injected ¹³¹I-proinsulin and ¹³¹I-insulin in
 - comparative pattern of disposition of, 400-410
- islets
 - effects of neurotoxins on, *457
 - glucose-stimulated lactate production in, *511
- isolated hepatocytes
 - insulin binding studies on, *450
 - structure-function relationships with growth hormone, *474
- isolated islets
 - alloxan stimulation and inhibition of insulin release from, 1205-1214
 - barbituric-acid protection against alloxan inhibition of glucose-induced insulin release by, 71-76
 - effect of age on insulin secretion by, *499
 - glucose-stimulated ⁴⁵Ca uptake in, 365-369
 - insulin release and ethanol in, *505
 - insulin and somatostatin release from, *507
 - and pyruvate and lactate stimulation of proinsulin biosynthesis and insulin release, *483
 - pyruvate metabolism and insulinotropic action in, *504
- isolated perfused pancreas
 - effects of prostaglandins on glucagon and insulin release from, 801-808
- kidney
 - insulin binding and degradation study, *451
 - insulin, proinsulin, and C-peptide clearance by, 192-196
- lithium treated
 - and stimulus-induced insulin secretion and glucose tolerance, *497
- liver
 - insulin degradation in, lysosomes and, *450
 - isolated parenchymal cells of, release of insulin binding proteins from, *473
- pyruvate metabolism, *491
- liver hepatocytes
 - insulin uptake by, *451
- liver plasma membranes
 - insulin binding and degrading sites in, *451
- muscle and kidney preparations
 - insulin-degrading activities of, 93, 94
- neurotensin hyperglycemia in
 - histamine and, 577-582
- pancreas
 - insulin secretion in response to glucose, tolbutamide and other secretagogues, 27-33
- pancreas islet cultures
 - repetitive responsiveness over time of, *509
 - and 3T3 fibroblasts, *440
- pancreas monolayer cultures
 - effects of preparative procedures on secretions by, *476
- pancreatic islets
 - insulin release related to cyclic AMP content of, 766-772
- perfused liver
 - and effects of uremia and uremic blood on insulin sensitivity of, *494
- perfused pancreas
 - and insulin and glucagon secretion and somatostatin analogs, *496
 - verapamil inhibition of calcium transport and glucagon release from, 996-1003
- perfused skeletal muscle
 - dichloroacetate effect on glucose and amino acid metabolism in, 1065-1073
- perfused islets
 - alloxan and D-glucose and insulin secretion study in, *456
 - indomethacin and insulin secretion study in, *457
 - vitamin A inhibition of insulin release in, *470
- portal vein islet transplantation
 - and fluorescein accumulation in eye, *435
- pregnant
 - and fasting, and adrenal medulla and sympathetic nerves, *486
- proinsulin C-peptide synthesis, 152-155
- protein fed
 - glucagon secretion in, *475
- skeletal muscle cells in tissue culture

 October, 969-1058
 November, 1059-1144
 December, 1145-1232

SUBJECT INDEX 1978

amino acid metabolism and alanine production in, *496
 spontaneous diabetes in, 1133
 streptozotocin diabetic and agarose gel analysis of glomerular basement membrane from, *471
 amino acid utilization in fat cells of, *479
 blood coagulation disorders in, *514
 carbohydrate restriction effects on pancreatic insulin and severity of diabetes, *504
 decreased protein activator in adipose tissue of, *505
 diabetic glomerulopathy following unilateral nephrectomy in, 35-40
 effects of Goldblatt hypertension on development of glomerular lesions in, 738-744
 effects of pancreatic islet transplantation on increased urinary albumin excretion in, 959-963
 immunohistopathology of glomerular antigens in, 632-641
 insulin regulation of ornithine decarboxylase in liver and hindlimb muscle of, *501
 intestinal very low density lipoprotein secretion in, 902-914
 intraperitoneal islet transplanted islets in, *510
 islet transplantation studies in, 817-823
 islet transplantation and urinary albumin secretion in, *506
 and isogenic pancreatic islet transplantation, *440
 kidney changes in, *432
 and liver cholecalciferol 25-hydroxylase of vitamin D₃, *432
 and McN-3495 compared with biguanides, 869, 870-872
 renal cortex pyrimidine metabolism in, *471
 and tissue somatostatin-like immunoreactivity, *442
 uremic site of insulin resistance in, 571-575
 uremic nephrectomized insulin metabolism from isolated liver and muscle from, *499

REDOX STATE
 cytosolic and dichloroacetate, 1072-1073

RENIN-ANGIOTENSIN-ALDOSTERONE SYSTEM
 in diabetics, 732-736

REPRODUCIBILITY INDEX
 for glucose tolerance tests, 715-725

RESPIRATORY DISTRESS SYNDROME
 in infants of diabetic mothers, *464

RETINA
 microvessels aldose reductase activity in, *475

RETINOPATHY, DIABETIC
 development of and early blood-retinal barrier breakdown fluorophotometry measurements, 85-87
 hypomagnesemia as risk factor in, 1075-1077
 and kidney transplantation, *435
 multiple daily insulin injections in treatment of, 592-596
 pathogenesis aldose reductase and, *475
 and renal disease pituitary irradiation and, *489

RETROGRADE EJACULATION
 and autonomic neuropathy, 1051

RHEUMATOID ARTHRITIS
 erythrocyte deformability in, 898

RNA
 antibodies to in juvenile-onset diabetes, 1105-1110
 of fish proinsulin purification of, and synthesis of complementary DNA, *456
 renal in diabetic rats, *481
 synthesis by rat hepatocytes insulin and, *494

RUBELLA VIRUS
 and diabetes development, 1129

S

SACCHARIN
 American Diabetes Association policy statement on ban on, 878-880

SALICYLATES
 hypoglycemic effect of, 1196

SALINE
 infusion in amino acid infusion study in premature infants, 335

SALIVARY GLANDS
 adrenergic fibers norepinephrine turnover in diabetic and nondiabetic mice, 971
 glucagon hypophysectomy and, *484

SALT
 retention in insulin-treated diabetics, 94

SAPONIN
 in insulin preparations, 297-298

SCATCHARD ANALYSIS, 89, 91
 of insulin binding data, 946
 of insulin binding to erythrocytes data, 705-706
 of insulin binding to monocytes in obese diabetics and nondiabetics, 1179

SCORPION TOXIN
 effects on rat pancreatic islets, *457

SECRETIN
 and insulin secretion, 782-783

SERUM
 antibodies to nucleic acids in juvenile-onset diabetics, 1105-1110
 creatinine in nondiabetic and insulin-requiring diabetic renal transplantation, *493
 electrolytes in diabetics, 733-736
 in hyperchloremic metabolic acidosis, 16, 17
 glucose and granulocyte function in diabetics, 891-894
 glucose, triglyceride and insulin in insulin deficient rats, 903-914
 glyburide, C-peptide, immunoreactive insulin and blood glucose correlation between concentrations in humans, *467
 immunoreactive glucagon

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

 November, 1059-1144
 December, 1145-1232

SUBJECT INDEX 1978

and stress in diabetics, *492
immunoreactive insulin
and glucose tolerance tests in offspring of conjugal diabetic parents, 716-725
insulinoma resection and, 774-777
immunoreactive nonsuppressible insulin-like protein
in fibrosarcoma, *433
immunoreactive parathyroid hormone
in hypomagnesemia and retinopathy study, 1076
insulin
in hyperthyroid patients and normal subjects, 543-548
insulin and growth hormone levels in premature infants
amino acid infusion and, 334-337
from insulin-resistant diabetics
effect on human adipocyte metabolism in vitro, 938-944
insulin response to plasma leucine elevation following oral amino acid loading
before and after jejunoileal bypass surgery, 80, 81
lipids and lipoproteins
in insulin-treated diabetes, 1078-1085
magnesium
in insulin-treated diabetics, retinopathy correlated with, 1075-1077
C-peptide immunoreactivity
assay systems, 184-191
and evaluation of residual beta-cell function, 262-264
prolactin
and familial multiple endocrine neoplasia type I, *512
somatostatin-like immunoreactivity
in fed, fasted and starved rats, *497
radioimmunoassay, 523-528
thyroid hormones and cholesterol
in normal subjects and hyperthyroid patients with age, 545-546, 547-548
triiodothyronine and cholesterol
in hypothyroid patients, normal subjects, and hyperthyroid patients, 546

SEX
and between-load differences in oral glucose tolerance tests, 44
and bimodality of glucose tolerance distributions, 794-799
diabetes prevalence in school-age

children in Minnesota by, 57-58
of diabetics in plasma glucagon response to oral glucose loading study, 1145, 1146
and food intake and behavior study, *469
and hypoglycemic symptoms during oral glucose tolerance tests, *484
of patients in glucose tolerance and viral hepatitis study, 662
of patients in hypertriglyceridemia study, 686, 687
of patients in insulin resistance and sulfated insulin studies, 312

SEXUAL DYSFUNCTION. *See also*

Impotence
in diabetic men
and plasma prolactin and testosterone, *515

SEXUAL FUNCTION. *See also*

Impotence; Retrograde ejaculation; Sexual dysfunction
in young adult diabetics
and endocrine evaluation of reproductive system, *493

SKIN

cultured fibroblasts
effects of glucose and sorbitol on proliferation of, 583-587
replicative capacity in diabetes and prediabetes, *459
viability in insulin-dependent juvenile diabetics, 338-341
preparation before insulin injection, *485
proinsulin and insulin disposition in rats, 404

SMOKING

bladder cancer and, 879
in hypomagnesemia and retinopathy study, 1076

SODIUM

and insulin binding to erythrocytes, 703, 707

SODIUM GLYCOCHOLATE

in insulin preparations, 297-298

SODIUM SALICYLATE

and restoration of acute insulin response to glucose, 750-755
reversal of alpha adrenergic inhibition of insulin secretion by, *493

SOMATOMEDIN

deficiency
in Mauriac syndrome, *479

SOMATOSTATIN

analogs
and inhibition of somatostatin release from dog islets of Langerhans, *443
and insulin and glucagon secretion from isolated perfused rat pancreas, *496
antibodies to
in studies of islet cells of spontaneously diabetic mice, 2-6
biosynthesis, *441
developmental pattern in fetal and neonatal rat pancreas, *473
and glucose homeostasis during arginine infusion, *489
and immunoreactive glucagon responses in pancreatectomized patients, 1005-1011
infusion in dogs
gastric inhibitory polypeptide effects on glucose turnover during, *499
and maintenance of glucose production during glucagon lack, *454
infusion in maturity-onset diabetics and plasma free fatty acids, glucagon, insulin, glucose and growth hormone, 1013-1018
infusion in normal subjects
and dose-related reactions of pancreatic hormones, *442
and insulin secretion inhibition in dogs, *442
-like activity
in tissues and serum of fed, fasted and starved rats, *497
-like immunoreactivity
in human plasma, *441
in human serum, 523-528
in plasma of alloxan diabetic dogs, *442
in tissues of streptozotocin diabetic rats, *442
pancreatic
and ventromedial hypothalamic lesions, *441
and plasma growth hormone, glucagon, and glucose levels
in normal subjects and juvenile diabetics, 300-305
release
alpha adrenergic agonism, and, *502

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

- release from isolated rat islets
insulin and, *507
- SORBITOL**
accumulation in cultured human endothelial cells, *446
and proliferation of cultured human skin fibroblasts and arterial smooth-muscle cells, 583-587
release by blood capillary preparation from eel swim bladder
glucose and, 108-112
- SPERM**
mobility
polyhydric alcohols and, 108
- SPHEROCYTOSIS, HEREDITARY**
erythrocyte deformability in, 898
- SPINAL ANESTHESIA**
impaired insulin secretion during, *480
- SPINAL CORD**
cervical transection
clonidine induction of insulin secretion in subjects with, 555-561
- SPLANCHNIC ARTERY**
alanine, 287
alanine extraction rate
in diabetics, 420
glucose balance after oral glucose ingestion
maturity-onset diabetes and, 121-126
net glucose and ketone body production
chronic hyperglucagonemia and, 643-647
- STAPHYLOCOCCUS AUREUS**
bactericidal activity of granulocytes of diabetics and, 889-894
- STARVATION**
"accelerated"
and fasting during pregnancy, *463
and feeding and fasting in rats
and tissue and serum somatostatin-like immunoreactivity in, *497
and glucose uptake by skeletal muscle, *462
and insulin regulation of ornithine decarboxylase in rat liver and hindlimb muscles, *501
- in rats
and dichloroacetate effects on glucose and amino acid metabolism, 1067-1072
- STEATORRHEA**
and weight loss after jejunoileal bypass, 83
- STENOSIS**
in diabetic and nondiabetic arterial occlusive disease
impotence and, 975-981
- STEROIDS**
in immunologic insulin resistance therapy, 307
- STEROL BALANCE**
and cholesterol metabolism in diabetics, *448
diabetic control and, 1059-1064
- STOMACH**
and autonomic neuropathy, 1046
isolated perfused dog
and control of gastric glucagon release, *487
- STORAGE TELEMETRY**
for detection of protamine-¹²⁵I-insulin in diabetics with and without insulin pads, *485
- STREPTOZOTOCIN DIABETES**
and insulin receptor binding by liver cell membranes, 1098
and lymphocyte-mediated immunologic abnormalities, 681
in Macaca monkeys
and hemoglobin A_{1c} assays, 1182-1187
in mice
and immunodeficiency, *460
superoxide dismutase and alcohol effects on, *460
testosterone and age effect on, *492
- in rats
and agarose gel analysis of glomerular basement membrane, *471
amino acid utilization in fat cells of, *479
and blood coagulation disorders, *514
carbohydrate restriction effects on pancreatic insulin and severity of diabetes in, *504
- and decreased protein activator in adipose tissue of, *505
diabetic glomerulopathy following unilateral nephrectomy in, 35-40
and dichloroacetate, 1067-1072
and effects of Goldblatt hypertension on development of glomerular lesions, 738-744
and effects of pancreatic islet transplantation on increased urinary albumin excretion in, 959-963
immunohistopathology of glomerular antigens in, 632-641
insulin regulation of ornithine decarboxylase in liver and hindlimb muscle of, *501
and intestinal very low density lipoprotein secretion, 902-914
and intraperitoneal islet transplanted pancreatic islets, *510
islet transplantation studies in, 817-823
islet transplantation and urinary albumin excretion in, *506
and isogeneic pancreatic islet transplantation, *440
kidney size changes and, *432
and liver cholecalciferol 25-hydroxylase of vitamin D₃, *432
and McN-3495, 858
and McN-3495 compared with biguanides, 869, 870-872
and pancreatic islet islet transplantation, 625-630
and portal vein islet transplantation, fluorescein accumulation in eye and, *435
renal cortex pyrimidine metabolism in, *471
and renal growth, *481
and tissue somatostatin-like immunoreactivity, *442
- STRESS**
and glucagon levels in diabetics and normal patients, *492
and islet stimulation by oral hypoglycemic agents, 326
and islet transplantation in diabetic rats, 817-823
- SUCROSE**
compared with fructose and glucose in reactive hypoglycemia, *438

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

September, 883-968
October, 969-1058
November, 1059-1144
December, 1145-1232

SUBJECT INDEX 1978

- ³H-SUCROSE**
as extracellular marker in barbituric acid uptake studies, 72
- SUGAR TOLERANCE TESTS**
in reactive hypoglycemics and normals
fructose, sucrose and glucose ingestion comparisons in, *438
- SULFONYLUREAS**
and calcium permeability of biological membranes, *481
effect on contractility of atrial preparations, 694-698
and gastric inhibitory polypeptide response to modest meal ingestion in maturity-onset diabetics, *472
glipizide
hepatic insulin receptor alterations and, *449
therapy
and glucose, insulin, and glucagon response to mixed meal in diabetics, *478
hospital admission diagnoses related to, *473
-treated diabetics
and plasma glucagon response to oral glucose loading in, 1145-1150
- SUPEROXIDE DISMUTASE**
in streptozotocin diabetic mice, *460
- SURFACTANT**
in insulin preparations
and nasal absorption of insulin in dogs, 297-298
- SURGERY**
in diabetics
use of artificial beta cell during, *431
femorotibial bypasses in diabetics with ischemia of lower extremity, *448
gastric bypass
in morbidly obese diabetics, *498
glucagon levels during
in normal and diabetic patients, *492
hypophysectomy
and salivary gland and pancreatic glucagon, *484
insulinoma resection
use of artificial endocrine pancreas during, 774-777
jejunoileal bypass, for morbid obesity
loss of insulin response to ingested amino acids after, 78-83
pancreatectomy
glucagon replacement and hyperaminoacidemia after, *454
and immunoreactive glucagon responses to oral glucose, insulin infusion and deprivation, and somatostatin, 1005-1011
pancreatic insulinomas and preoperative localization by arteriography, *509
portal-systemic bypass
and C-peptide and insulin metabolism, 203-204
pyloroplasty and vagotomy
and glucose-stimulated serum immunoreactive gastric inhibitory polypeptide secretion, 640
unilateral nephrectomy in streptozotocin diabetic rats
diabetic glomerulopathy following, 35-40
ureter-ligation in dogs
and epinephrine enhancement of potassium-stimulated immunoreactive insulin secretion study, 550-553
- SWEATING DISORDERS**
and autonomic neuropathy, 1048-1049
- SWINE.** See Yucatan miniature swine
- T**
- TECHNICON AMINO ACID ANALYZER**
in alanine metabolism study in healthy subjects, 288-294
- TEMPERATURE**
and barbituric-acid protection against alloxan inhibition of glucose-induced insulin release by isolated rat islets, 71, 73, 74, 76
and insulin binding to adipocytes, 950, 951
and insulin binding to erythrocytes, 704
and insulin binding to renal cell membranes, 90
and time lag in coupling between insulin receptors and glucose transport in rat adipocytes, *452
- TESTIS**
tissue of obese hyperglycemic mice catecholamine metabolism in, 392-394
- TESTOSTERONE**
in streptozotocin diabetic mice, *492
- TETRA-ETHYL-AMMONIUM**
and potassium permeability of pancreatic B-cells, *500
- TETRAGASTRIN**
injection into pancreatic artery of dogs
early time course of insulin release and, 1189-1195
- THEOPHYLLINE**
and insulin release from human fetal islets of Langerhans, *477
insulin secretory responses to in stressed islet-transplanted diabetic rats, 820
- THROMBOXANE A₂**
and insulin secretion, *457
- THYROID GLAND**
hyperthyroidism
fasting and development of ketonemia and, *504
hyperthyroidism
and proinsulin hypersecretion, *480
monodeiodination of thyroxine in newly diagnosed juvenile diabetics, *498
pseudohypoparathyroid and hypoparathyroid
hyperglucagonemia in, *491
- THYROID HORMONES**
in normal subjects and hyperthyroid patients
age and, 545-546
- THYROTROPIN-RELEASING HORMONE**
response in diabetics to, *474
- THYROXINE**
metabolism
in newly diagnosed juvenile diabetics, *498

December, 1145-1232

SUBJECT INDEX 1978

TISSUES

- blood capillaries from rete mirabile of eel swim bladder
 - glucose-induced alterations of metabolism of, 108-112
- canine pancreatic
 - pancreatic polypeptide, insulin, and glucagon secretion and concentration in, 96-101
- cell membranes
 - fluidity of, hexose uptake and, *452
- of diabetic mice
 - norepinephrine content of, 969-974
- extrahepatic
 - alanine formation in, 287
- gastrointestinal and pancreatic of rats, dogs and humans
 - glucagon- and gastric inhibitory polypeptide-containing cells of, *441
- isolated rat diaphragms
 - tryptophan metabolism and insulin in, *469
- lipoprotein lipase in rats
 - estrogen and nutritional state and, *507
- liver
 - and sulfonylurea-induced changes in calcium permeability of, *481
- liver and hindlimb
 - in insulin resistance study in uremic rats, 571-575
- metabolites
 - and dichloroacetate, 1070
- mouse hemidiaphragm
 - in assays of insulin-neutralizing capacity of patient serum, 309
- of obese hyperglycemic mice
 - monoamine oxidase, catechol-O-methyltransferase, and norepinephrine levels in, 389-394
- rat
 - insulin-degrading activity of, 93, 94
- rat muscle and adipose
 - in-vitro and in-vivo response to insulin in high- and low-fat diet-fed rats, 114-119
- from renal biopsies
 - in diabetic rats following unilateral nephrectomy, 35-40
- skeletal muscle cultures
 - amino acid metabolism and alanine production in, *496
- somatostatin distribution, 523
- somatostatin-like immunoreactivity in fed, fasted and starved rats, *497
- of streptozotocin diabetic rats

- somatostatin-like immunoreactivity in, *442
- toadfish islets
 - glycosaminoglycan synthesis by, *511

TOADFISH

- islets
 - glycosaminoglycan synthesis by, *511

TOLBUTAMIDE

- and acute insulin responses in man, *497
- cardiotoxic action of, 694-698
- injection into pancreatic artery of dogs
 - early time course of insulin release and, 1189-1195
- insulin secretory responses to in stressed islet-transplanted diabetic rats, 820
- rat pancreas immediate insulin-secretory response to compared with glucose and other secretagogues, 27-33
- stimulated immunoreactive insulin secretion
 - epinephrine infusion and, 550

TRANSPLANTATION

- fetal pancreatic in alloxan diabetic rats and insulin effect on transplant growth, *492
- of fetal rat pancreases into normal and diabetic rats
 - insulin content of, *512
- intraoperative islet transplantation
 - long-term functional integrity of, *510
- intraportal islets
 - in diabetic rats, 817-823
- and islet allograft rejection mechanisms, *440
- of islets in diabetic rats
 - and fluorescein accumulation in eye, *435
- isogenic pancreatic islets
 - effect on recipient and transplanted islets, *440
- kidney
 - in diabetics, visual status and, *435
- of neonatal rat islet tissue and tissue storage methods, *440
- pancreatic, in alloxan diabetic rats and prevention of kidney and eye lesions, *446
- pancreatic islet cell
 - future research needs, 427-429

- in streptozotocin diabetic rats, urinary albumin excretion and, *506, 959-963
- pancreatic in mice
 - and immunoreactive insulin stores in transplants related to recovery from hyperglycemia and glucose intolerance, *486
- pancreatic in rats
 - and nutritional and biochemical studies, *493
- renal
 - plasma glucagon and serum creatinine patterns in diabetics and nondiabetics and, *493
- syngeneic, of fetal pancreases
 - and effect of insulin treatment on growth and differentiation of implants, 988-994
 - and effect of insulin treatment on reversal of alloxan diabetes in rats, 982-986

TRASYLOL

- as protective agent in serum radioimmunoassays, 523

TRICHLOROACETIC ACID

- ratios of precipitable to soluble radioactivities in ¹³¹I-proinsulin and ¹³¹I-insulin studies in rats, 401-406

TRIETHYL TIN

- and mitochondrial calcium uptake, 762

TRIGLYCERIDES

- hepatic secretion in diabetic hypertriglyceridemia, *448
- ingestion in normal and diabetic subjects
 - and gastric inhibitory polypeptide secretion and responses to intravenous glucose, 327-333
- intestinal secretion of
 - in insulin-deficient rats, 902-914
- levels
 - in diabetics with femoral disease, *448
- medium chain
 - protective effects against hypoglycemia, 1089
- metabolism
 - role of insulin in, 682-692
- patterns
 - in insulin-treated diabetics, *444
- synthesis by liver
 - hormonal regulation of, *513

SUBJECT INDEX 1978

TRIIODOTHYRONINE
alterations in, and reverse triodo-
thyronine concen-
trations
in newly diagnosed juvenile diabet-
ics, *498

TRYPTOPHAN
metabolism by isolated rat diaphragms
insulin and, *469

TUMORS
familial multiple endocrine neoplasia
type I
hyperprolactinemia and, *512
fibrosarcoma
hypoglycemia secondary to nonsup-
pressible insulin-like protein
secreted by, *433
glucagonoma
and hepatic metabolism, 643-647
insulin-producing
preproinsulin assays in, *455
insulinomas
morphologic characteristics related
to functional behavior of,
*468
resection with use of artificial en-
docrine pancreas, 774-777
non-B-cell
and hypoglycemia associated with
non-suppressible insulin-like
protein, *498
pancreatic endocrine
plasma pancreatic polypeptide
levels and, 96

TWINS
identical
diabetes development in, 1134-1135
genetic heterogeneity of diabetes
and, 1118

**¹²⁵I-TYR¹ SOMATOSTATIN-LIKE
IMMUNOREACTIVITY**
serum degradation of
EDTA and trasylol and, 523-524

TYROSINE AMINOTRANSFERASE
in primary hepatocyte cultures, *509

U

ULCER
duodenal
and gastric inhibitory polypeptide
hypersecretion, 640-641

UREMIA
acute
site of insulin resistance in, 571-575
and hepatic insulin sensitivity in rats,
*494
and insulin metabolism in liver and
muscle tissues, *499

URINE
albumin excretion
in pancreas islet transplanted dia-
betic rats, *506, 959-963
glucose
determination of plasma glucose
from, *437
hemoglobin values and, *434
glucose determinations, 221-223
comparison of methods used for,
810-816
glucose excretion
in mathematical model of glucose-
insulin homeostasis, 1031
metabolites
high-fat diet and, 1088
3-methoxy-4-hydroxymandelic acid
excretion
in obese and normal weight women,
389
norepinephrine and epinephrine
in fasted pregnant rats, *486
C-peptide immunoreactivity in, 210-
215
proinsulin and insulin excretion in
rats, 404
proteins
in diabetics, *490
sodium and potassium excretion in
diabetics, 733

V

VALSALVA MANEUVER
for assessment of autonomic nervous
control of heart in diabetes,
1168-1174

VANILMANDELIC ACID
urinary excretion
in obese and normal weight women,
389

VASCULAR DISEASE
and circulating immune complexes in
diabetics, *486
in diabetics
heterogeneous nature of, 1122-1123
hyperglycemia and, 583
and ischemia

and impotence in diabetic and non-
diabetic arterial occlusive dis-
ease, 975-981
and sympathetic nerve function, 973

VASCULAR SYSTEM
arteriolar alterations in genetically
diabetic mice, *445
peripheral arterial disease in diabetics
lipid levels and, *448

VEINS
pancreatic
uniphasic insulin-secretory re-
sponse after enteric glucose
load in dogs, 21-26

**VENEZUELAN ENCEPHALITIS
VIRUS**
and diabetes development in golden
Syrian hamsters, 1132-1133
-induced carbohydrate metabolism de-
fects
in genetically diabetic mice, *477

**VENTRICULO-CISTERNAL
PERFUSION**
in dogs
in effect of acute hypoglycemia on
¹⁴C-palmitate removal dur-
ing, *476

VERAPAMIL
calcium antagonism by
and glucagon release from pancre-
atic A₂-cell, 996-1003
and calcium blockade
in insulin release study, *456

VERATRIDINE
effects on rat pancreatic islets, *457

VIRAL HEPATITIS
glucose tolerance in, 661-668

VIRUSES
Coxsackie B3
in pancreatic beta cell cultures of
diabetics, 778-781
and diabetes pathogenesis, 1126-1136
and juvenile diabetes onset, *465
Venezuelan encephalitis
-induced carbohydrate metabolism
defects in genetically diabetic
mice, *477

VISION
and renal transplantation in diabetics,
*435

DIABETES: VOLUME 27 (1978) PAGE NUMBERS BY ISSUE

March, 287-356

April, 357-430

Supplement 2, 431-522

May, 523-610

June, 611-700

July, 701-792

August, 793-882

September, 883-968

October, 969-1058

November, 1059-1144

December, 1145-1232

VITAMINS

- A
 - and insulin release, *470
- C
 - and platelet hyperaggregation in diabetes, *447
- D₃
 - liver cholecalciferol 25-hydroxylase of, in diabetic rats, *432
 - after jejunoileal bypass surgery, 79

VON WILLEBRAND'S PLATELET FACTOR, 342, 345-346

W

WATER

- deionized
 - and induced acute water intoxication in mice, 61-63
- intake
 - glucoprivation and, *507

WATER INTOXICATION

- acute, in mice
 - and hyperglycemia, hypoin-
 - sulinemia, and

- hyperglucagonemia, 61-63
- hyperglycemia caused by, *508

WEIGHT. *See also* Obesity

- of diabetic rats with and without unilateral nephrectomy, 36-37
- effects of ketosis and chronic hypoglycemia on, 1090
- gain
 - sulfated insulin therapy in insulin resistant patients and, 311, 313
- loss
 - in diabetics, and recovery of late phase insulin secretion, *502
 - and gastric bypass in morbidly obese diabetics, *498
 - after jejunoileal bypass surgery, 79, 83
- of patients in glucose tolerance and viral hepatitis study, 662
- and serum lipid and lipoprotein levels of diabetic subjects, 1081-1082
- of subjects in acute insulin response and sodium salicylate study, 750, 751

X

¹³³XENON

- in hepatic blood flow measurement, 710

X-RAYS

- of gastrointestinal tract of ketotic diabetic hamsters, *475

XYLITOL

- injection into pancreatic artery of dogs
- early time course of insulin release and, 1189-1195

D-XYLOSE

- and somatostatin infusion, *442

Y

YUCATAN MINIATURE SWINE

- glucose intolerance in
- and insulin secretion, *497

Z

ZINC

- uptake in isolated rat islets, *490

AUTHOR INDEX 1978

In this index are the names of authors of articles that have appeared in **DIABETES** during 1978; authors of Abstracts appearing in Supplement 2 are indexed in that issue. The Subject Index appears on page 1.

A

Abe, Ryuzo, 682-693
Abraham, E.C., 931-937
Adar, Raphael, 975-981
Akanuma, Y., 938-945
Alberti, K. George M.M., 201-206
Albisser, A. Michael, 774-777
Allen, R.C., 384-388
Amatruda, John M., 78-84
Angel, Aubie, 774-777
Aoki, Thomas T., 1065-1074
Araoye, Matthew A., 127-134
Archer, Juanita A., 701-708
Ashikaga, T., 592-596
Asplund, Kjell, 611-619
Azar, Silvia, 738-744

B

Baetens, D., 1-7
Bagdade, John D., 677-681, 889-894
Baldwin, David, 653-660
Baron, Steven H., 1196-1204
Barry, C. David, 1205-1214
Bear, R., 16-20
Beaty, Harry N., 889-894
Beck-Nielsen, Henning, 1098-1104, 1175-1181
Beischer, B., 235-240
Beischer, W., 235-240, 670-676
Bennett, Terence, 1043-1054, 1167-1174
Berelowitz, M., 523-529
Bern, Murray M., 342-350
Bertolini, D., 757-765
Bevilacqua, Maurizio, 1196-1204
Bierman, Edwin L., 583-588
Bilbo, James T., 49-56
Binder, Christian, 170-177, 184-191, 201-206, 207-209, 226-229, 262-264, 1075-1077
Blanchard, Richard F., 88-95
Blas, Susan D., 88-95
Blix, Petra M., 170-177, 184-191, 267-271

Boden, Guenther, 643-648
Borodic, G., 592-596
Bowen, H.F., 420-426
Boyd, David P., 135-136
Brach, Elizabeth L., 1059-1064
Bradley, Carole J., 701-708
Bransome, E.D., Jr., 931-937
Bridi, Gary, 856-867, 868-876
Brooker, Gary, 694-698
Brown, David M., 35-41, 632-642, 738-744, 959-964
Brown, J.C., 782-787
Bucolo, Richard J., 840-848
Buse, M.G., 384-388
Buysschaert, M., 825-833

C

Carter, James R., Jr., 377-383
Cataland, Samuel, 638-642
Cerasi, Erol, 319-326
Chacra, Antonio R., 21-26
Chance, Ronald E., 96-101, 161-169
Chang, Helen, 946-958
Chapman, Lloyd W., 550-553
Charbonnel, Bernard, 661-664
Chen, Mei, 750-756
Chez, Ronald A., 1182-1188
Chiasson, Jean-Louis, 563-570
Chochinov, R.H., 287-295, 420-426
Christensen, N.J., 745-749
Christensen, S.E., 300-306, 1013-1019
Christiansen, C., 262-264, 1075-1077
Christlieb, A. Richard, 732-737
Chupin, Françoise, 661-669
Chupin, Maurice, 661-669
Clarke, William L., 649-652
Cloutier, Michael C., 1112-1125
Coleman, D.L., 1-7
Connon, J.J., 715-725
Cope, N.D., 931-937
Cotelingam, James D., 620-624
Crowther, Robert L., 1112-1125
Cruz, Angelita, 267-271
Cuendet, Guy S., 766-773

D

Danney, Mark M., 1020-1026
Davidoff, F., 757-765
Davidson, John K., 307-318, 810-816
Davidson, Mayer B., 550-553
Davis, J.E., 102-107
Davis, Paul J., 88-95
Day, J.L., 715-725
De Mey, J., 251-261
DeBra, Donald W., 307-318
D'Elia, John A., 732-737
Dietze, Günther, 709-714
Dirgo, John A., 61-63
Distefano, G., 334-337
Doisy, Richard J., 49-56
Dolkas, Constantine B., 571-576
Donald, R.A., 1151-1155
Drash, Allan, 1092-1097
Dupre, J., 327-333

E

East, L. Elizabeth, 589-591
Eaton, R. Philip, 915-924
Efendić, Suad, 319-323
Eisenstein, Albert B., 370-376
Elster, Alan, 801-809
Espiner, E.A., 1151-1155

F

Faber, C.E.K., 170-177, 184-191, 197-200, 201-206, 207-209, 226-229, 262-264, 1075-1077
Fajans, Stefan S., 1112-1125
Farquhar, Iain K., 1167-1174
Feldman, Jerome M., 389-395
Felig, Philip, 121-126
Foà, Piero P., 1196-1204
Foster, Richard O., 1027-1042
Frankel, Barbara J., 365-369
Freinkel, Norbert, 611-619
Frohman, Lawrence A., 577-582
Fujita, Yoshikuni, 21-26
